#### BUSINESS TERMS.

ADDRESS all General Correspondence, Payments, Plant Orders, &c., to Clibrans, Altrincham.

Orders for Seeds, Bulbs, Plants, Garden Requisites, or any other class of Nursery Goods, sent to any of our establishments, will receive immediate attention.

REMITTANCES.—Accounts due Quarterly and Half-yearly, strictly nett; 5 per cent. discount allowed off the majority of Garden Requisites, Seeds and Bulbs;  $2\frac{1}{2}$  per cent. off Plants, Trees, &c., for cash within 14 days after the receipt of invoice. Small amounts may be remitted in stamps. No receipts sent for sums under 2/6, unless stamp is sent to cover postage.

OCCASIONAL CUSTOMERS.—In cases of small orders, customers are respectfully requested to send remittances in prepayment.

NOMENCLATURE.—Every care is taken to supply goods true to name, but mistakes may occur. We shall be glad if our patrons will communicate with us immediately an error is discovered, and we will then return the amount paid or replace with the true variety, if in stock; but we cannot take further responsibility. Please note, goods are supplied on this condition only.

PACKAGES .- Crates, Baskets, and Mats are invariably charged at less than cost of material, and in no case when returned can the full amount charged be allowed, as value is depreciated by the journey. We allow their intrinsic value when received here, and in no case will this exceed two-thirds of invoice price. Material used in the packing of bundles is not returnable. Sender's name and address should be attached to packages when returned, and an advice sent by post.

CARRIAGE OF GOODS.—Bulbs and Seeds are sent carriage paid. Plants, Trees, and heavy Garden Sundries, if ordered in cart or lurry loads, will be delivered free any reasonable distance from the Nurseries, or if a railway truck load is ordered, we will make special carriage arrangements, according to amount, distance, &c., but in no other cases can we pay carriage on these unless we charge it in invoice; extra Plants, however, are always added to compensate in part for carriage when not delivered free.

PLANTS IN STOCK.—All orders are received subject to the Plants being in stock at the time. When not in stock no substitution will be made unless the customer desires.

LATE ORDERS.—In cases of failure when Plants are ordered out of season, we cannot take any responsibility, as such arise through causes beyond our control.

ACCURACY OF DESCRIPTION.—The descriptions of many varieties of Plants are those of the raiser, for which we cannot take any responsibility, but every care is taken to truthfully describe.

COMPLAINTS respecting damage in transit, or relating to goods supplied, must be made immediately on reccipt or cannot be entertained.

#### Where our Plants are grown

Hale, our Headquarters, where our Glasshouses are situated, is 9 miles south-west of Manchester, sufficiently distant from the city to escape the baneful effects of its smoke. Being at a considerable altitude, our plants have the advantage of growing in a clear and pure atmosphere, a condition that is essential to the proper development of their vigour

#### The Glasshouses

and constitution.

overhead hot water pipes in several houses.

Our Glass Structures are all new, being erected about 6 years ago, when we moved our headquarters to the present site. They total 28 in number, are all span roofed and vary in width from 11 feet to 23 feet. With four exceptions they are all 180 feet in length. A corridor house, 540 feet in length, runs along and connects the houses together along one end.

With a view to adapting our houses as closely as possible to the needs Some Novel of the plants, and to facilitate attention to them, several novel features Features have been introduced in our houses. A narrow gauge tramway runs along the entire length of the corridor, connecting with and running through every house. Our water supply is pumped by means of the Windmill to a reservoir on some high ground about half a mile distant; from there it gravitates through a system of pipes to taps in every house. The system of heating is most modern, including

Anyone who is at all fond of plants, or flowers, cannot fail to be An Invitation interested in a visit to our establishment. In addition to the extensive Glasshouses, there are 400 acres of out-door nurseries. We heartily welcome a visit of inspection by anyone interested. If necessary, arrangements will be made to meet visitors at the railway station, on receiving an intimation a few posts in advance.

# Special Collections

## :of Indoor Plants:

THE following collections are of exceptional value. At the low prices quoted the selection of varieties must be left entirely to us, except that as far as possible we will omit sorts that customers already have, if required to do so. In the majority of cases the plants are in small pots and intended for Spring delivery; later in the season when they are potted on, higher prices will be charged in some cases.

#### Half of any of the Collections at Half-Price.

Note—ARRANGEMENT OF LIST. The various large classes of Plants are placed in alphabetical sequence throughout the List. The smaller families are grouped together under the heading of "Greenhouse" or "Stove Plants," according to the temperature necessary for their growth An alphabetical index of every item in this List will be found on the latter pages.

# INDOOR PLANTS

For Stoves, Greenhouses, Conservatories, &c.

Photo?

AZALEA INDICA.

Note the wonderful profusion of bloom.

Clibrans

### Azalea Indica.

Well-known plants for greenhouse and conservatory decoration. They bloom early in the year, and can be had in flower for some months. Fine plants set with buds in choicest colours and variety, 2/-, 2/6 and 3/6 each; 21/-, 24/-, 30/- to 36/- per dozen.

### Azalea, Ghent and Mollis.

Very showy and useful for indoor decoration. If placed in a stove they may be brought into flower early in the year; before the flowers are fully expanded remove to a cooler house, where they will last for a long time in full beauty. The colours embrace a variety of shades in orange, yellow, red, salmon, &c.

Fine plants, of either class set with buds, 1/6 and 2/6 each; 18/- to 24/- per dozen. Plants of either class, without buds, 1/- each; 9/- and 12/- per dozen.

DAVIESII, magnificent pale sulphur, changing to white, sweet scented, splendid for forcing, 2/- and 2/6 each.

### Clibrans' Tuberous Begonias.

Careful fertilisation and selection over a period of many years has resulted in Tuberous Begonias of the highest excellence. Our aim has been to produce dwarf habit, freedom in the production of large flowers in clear and well-defined colours and shades, carried upright on stout stems. In this we have succeeded. We cordially invite inspection when in bloom, from the beginning of July until the middle of September.

**CULTURAL NOTE.**—Begonia Tubers should be started into growth any time from February to March, the tubers intended for bedding being placed in boxes. A mixture of good loam, leaf mould, and coarse sand, with well-rotted manure, is the best compost. Pot firmly, placing the tubers just below the surface of the soil; the potting compost should be moistened before use. Allow plenty of drainage, and place any rough portions of soil at the bottom over the crocks. Water sparingly until the plants are growing freely, and re-pot into larger pots as required. In the growing season, especially during hot weather, water freely, and on no account allow the plants to become dry. Plenty of air and light are essential at all stages of their growth, and when grown under glass the flowering plants require to be shaded from the sun during the hottest part of the day. After flowering, gradually withhold water until the tops die down, when the tubers should be placed in sand or cocoa fibre, and stored away in a cool dry place. Examine occasionally to see if any signs of decay.

### Superb Double-Flowered Varieties.

TUBERS, Choice un-named double varieties, to colour, 1/-, 1/6 to 2/6 each; 9/-, 12/-, 18/- and 24/- per dozen.

MIXED SEEDLINGS, unbloomed, containing a large percentage of doubles, 3/- per dozen, 21/- per 100.

Seed of our superb Double Strain, 2/6 per packet.

### Choicest Named Varieties. Plants ready in May.

Seed from specially selected double varieties; per pkt. 2/6.

The following embrace the best in cultivation. In addition to sterling varieties of our own raising, we include meritorious varieties from various sources.

#### 12 choice named varieties, our selection from the following, 18/-, 24/- and 42/-

[Clibrans

272. Washington, A.M., R.H.S., produces an abundance of trusses of perfectly double, bright scarlet flowers, contrasting well against the bright dark green foliage, giving a dazzling and beautiful effect; wonderfully tenacious and lasting; dwarf habit, rarely exceeding 9 ins. in height; for decorative effect, as a pot plant, or for bedding it is unequalled. We know of nothing more free, beautiful, or effective than this superb variety. See illustration above; in 3 inch pots. 1/- each, 9/- doz.; in 4½ inch pots, 12/- and 15/- doz.

### Clibrans' Single Begonias.

Are characterised by a dwarf sturdy habit; full-grown plants are seldom 12-in, in height. They bear large brilliantly-coloured flowers on stiff upright stems, so that the flowers are all open to the eye, without the aid of sticks and tying. The improvement has been so marked that we have discarded almost the whole of our single-named kinds, the seedlings being of better habit, freer in blooming, more brilliant in colour, and larger in size.

### Dry Tubers. Selected to Colour.

Crimson, Scarlet, White, Yellow or Bronze, Pink, Dark Rose, Blush or Salmon, 4/- per doz., 25/- per 100.

Mixed Colours, 2/6 per doz., 17/6 per 100. Extra Fine Selected, 6/-, 9/-, and 12/- per doz.

WE ALSO OFFER ABOVE AS PLANTS in 3-in. pots IN MAY, at an advance of 6d. per doz. or 4/- per 100 on above prices.

SEED of this superb single strain, 1/6 and 2/6 per pkt.

Tuberous Begonias-continued.

### Sweet-scented Single Begonia.

288 **Baumanni,** a charming species, flowers of large size, and bright rose colour, slightly perfumed Admirable for conservatory decoration. 9d. each, 6/- per doz.

### Clibrans' Superb Crested Begonias.

(Begonia Hybrida Cristata).

A distinct and beautiful type, flowers of large size and fine form, each petal carrying a cocks-comb-like crest extending from the base and spreading outwards until it terminates in a series of charming undulations just within the margin of the petal. These Begonias are of strong constitution, carrying the flowers on erect stems. They embrace a wide range of colour, from pure white to deep crimson.

Price—Tubers, selected to colour, 9d., 1/-, to 1/6 cach; 6/-, 9/-, and 12/- per doz.

"
mixed colours, very finc, 4/- per doz.

Seed saved from the finest varieties, 1/6 and 2/6 per pkt.

### Young Seedling Begonias.

During May we can supply young plants of Begonias from boxes grown from our own seed as follows:—

Singles, white crimson, scarlet, rosc, pink, or yellow, 2/- per doz., 12/- per 100

Singles, mixed colours, 1/6 per doz., 8/- per 100

Doubles, mixed colours, 2/- per doz., 12/- per 100

Grested, white, scarlet, yellow, rose, or pink, 2/- per doz., 12/- per 100

Crested, mixed, 1/6 per doz., 8/- per 100

VIEW OF A PORTION OF OUR GLASSHOUSES.

## Autumn and Winter-Flowering Begonias.

"Gloire de Lorraine" Type.

This section, of which Gloire de Lorraine was the forerunner, is now well-known and highly Blooming during the antumn and winter months, being of light elegant appearance and producing a marvellous profusion of flowers, they are admirably adapted for Conservatory and Table decoration, Table decoration,

### New Variety 978 "Patrie."

(B. Socotrana × B. Pearcei var).

Award of Merit, R. H. S., Jan. 12th, 1909.

This variety, from the same Raiser as the well-known Gloire de Lorraine, is the latest introduction in this section. In flower and habit generally it somewhat resembles Gloire de Lorraine, the flowers, though not quite so large, are produced with exceptional freedom, covering the plant from base to summit; colour, rose-pink, suffused salmon-red, vivid and distinct. The plant remains in full bloom for many weeks.

#### Plants ready in August, 2/6 each, 24/- doz.

Press Notices on Begonia "Patrie."

Extract "Gardeners' Chronicle," Jan. 16th, 1909.

"The plants were about 10 inches high and compact in habit. The flowers are rich rose-pink, but by reason of the yellow anthers they appear to have an orange shade,"

Extract "Journal of Horticulture," Jan. 14th, 1909.

"Dwarf and sturdy, with good trusses of salmon-carmine flowers, a nice cherry colonr."

Extract " The Garden," Jan. 23rd, 1909.

"Of dwarf compact habit, not more than 8 to 9 inches high, with medium size flowers of a coppery-red shade, very freely produced. Notable for its dwarf habit and profuseness of bloom."

Autumn and Winter-Flowering Begonias, "Gloire de Lorraine" Type-continued.

### General Collection.

#### Prices, except where otherwise stated.

YOUNG PLANTS, in 3-in pots, ready in May. 4d. and 6d. each. 3/6 and 5/- per doz. PLANTS in  $4\frac{1}{2}$  and 5-inch POTS, later in the season 1/- and 1/6 each. 9/-, 12/-, and 18/- per doz.

No.

- 907 **AGATHA**, A.M., R.H.S.; resembles *Gloire* de Lorraine, whilst the habit is more compact. See illustration on page 9.
- 910 AGATHA COMPACTA, A.M., R.H.S.; charming rosy-pink, produced with the utmost freedom. The plants are from 9-in. to 12-in. in height, and admirably suited for pot culture, as they require little staking. This is the dwarfest of the winterflowering Begonias.
- 917 ALBA GRANDIFLORA, a very beautiful whiteflowered form; vigorous grower, excellent habit, and profuse bloomer.
- 947 GLOIRE DE LORRAINE, A.M., R.H.S.; the forerunner and best known of this class; a superb plant, producing an abundance of rose-pink flowers; grand for decorative purposes, either in pots or baskets.
- 961 MASTERPIECE, A.M., R.H.S.; somewhat similar to *Gloire de Lorraine*, but stronger and more upright in growth, with larger flowers of richer colour.

No.

- 968 MRS. LEO DE ROTHSCHILD, A.M., R.H.S., an improved form of *Gloire de Lorraine*, with larger flowers; a superb variety.
- 990 **THE KING,** a stronger and more vigorous form of *Gloire de Lorraine*; more upright in habit and producing larger flowers.
- 995 TRIOMPHE DE LEMOINE, a remarkable variety, blooming in February, after all others are over; the rosy-pink flowers, not quite so large as those of Gloire de Lorraine, are produced in elegant branching heads, well above the dark shining green bold handsome foliage; the flowers are very persistent and the plant remains in full beauty for several weeks.

  9d. each, 7/6 doz.
- 998 TURNFORD HALL, A.M., R.H.S.; a superb variety, flowers large, white, slightly shaded with apple blossom pink; vigorous, remarkably profuse.

#### Press Notices on New Begonla "Clibrans' Pink."

For description and illustration of this variety see page 12.

Extract "Gardeners' Chronicle," Nov. 14th, 1908.

"An excellent addition to Winter-Flowering Begonias. The flowers are double, and in colour a rich shade of earmine-pink. The plants are very floriferous and the habit is good."

Extract "Journal of Horticulture," Nov. 12th, 1908.

"The flowers are double and of good size, rich bright warm pink, in heavy trusses or clusters well above the dark foliage. The habit of the plant is sturdy and bushy. A very excellent novelty."

Extract "The Gardeners' Magazine," Nov. 21st, 1908.

"A fine addition to the Winter-Flowering Class. The flowers are large, deep rosy-pink, with petals nearly an inch across. The foliage is large and bold, while the habit of the plant is good."

Extract "The Garden," Nov. 21st, 1908.

"A charming addition and likely to become immensely popular by reason of its delightful habit of growth and the profusion of large pure salmon-pink blossoms which adorn the plant. Little more than 15 inches high when shown, the plant develops a large head of blossoms above the handsome leafy growth which constitutes so admirable a setting to the flower. It is absolutely distinct from all existing varieties."

Extract "Gardening Illustrated," Jan. 2nd, 1909.

"It is a double-flowered variety, vigorous and free in habit of growth and flower, and an unmistakable acquisition."

### Clibrans'

### New Hybrid Winter-Flowering Begonias.

(Begonia Socotrana x Tuberous Varieties).

PROBABLY no new race of plants has roused so great an interest, or proved of such great value to the gardener and flower lover, as have the new Hybrid Winter-Flowering Begonias. They are the outcome of crossing "Begonia Socotrana" (a pink-flowered species, with fibrous roots, producing small bulbil-like growths at the base of the stem, a plant but rarely seen outside of Botanical Gardens) with selected double-flowered varieties of the well-known Summer-Blooming tuberous-rooted Begonias.

The result has been the raising of an entirely new race, possessing the great advantage of commencing to flower in the autumn, when the summer varieties have ceased, and continue to bloom profusely until the early months of the following year.

The colours embrace pink, rose, carmine, red and some intermediate shades. The flowers are double, semi-double and single, according to the variety, and are wonderfully lasting either on the plant or when cut.

Whilst all the varieties mentioned in the following pages are of exceptional beauty, we particularly direct attention to "Clibrans' Pink," "Miss Clibran," "Clibrans' Triumph," "Beauty of Hale," and "Rosy Morn."

**Cultural Note** 

The cultivation of these new Hybrids is not difficult, providing the following hints are borne in mind and acted upon.

**CUTTINGS** (formed from the young shoots springing from the axils of the leaves when the resting period is over) may be struck from April to August, in a temperature of 65 to 70 degrees; pot on as required and later place them in a temperature of 60 to 65 degrees. Shade from bright sunshine. Water carefully at all times, but maintain a moist atmosphere throughout the growing period, giving air on favourable occasions. Cuttings struck from April to June will make large exhibition plants in 6½ inch pots; those struck during July will make good plants in 5 inch pots. During autumn the plants will commence to bloom and continue to do so throughout the winter.

When the flowering period is over, water should be given very carefully, just sufficient to prevent them becoming too dry. Continue this treatment until the plants show signs of starting growth, when supplies should be increased.

The compost best suited for these plants consists of three parts loam, one part leaf mould, and one part silver sand for cuttings; for larger plants add a little well-decayed manure.

### " Clibrans' Pink."

(See illustration below).

Award of Merit, R.H.S., Nov. 10th, 1908. Now offered for the first time.

Bright Pink Double Flowers, 3 inches across, produced in long drooping sprays carrying from eight to thirteen flowers each. The plant is a good grower and a free bloomer. The dark green bold handsome foliage serves to intensify the brilliant colouring of the flowers. A superb plant in every way, quite distinct from any other variety. One of the finest we have ever raised.

#### Plants ready in August, 10/6 each.

For Press Notices of this variety see page 10.

Photo;

"CLIBRANS' PINK."
Colour of flowers, bright pink.

[Clibrans

### 832 "Miss Clibran."

(See Illustration below).

Award of Merit, R. H. S., Nov. 12th, 1907. Introduced in 1908.

Rich Blush Pink Perfectly Double Flowers, 3 in. in Diameter, freely borne on slightly arching sprays; a magnificent flower of distinct and handsome appearance. The habit is strong and sturdy, the foliage of a deep rich green; it is a good grower and free bloomer. The illustration below gives a good idea of the appearance of this fine variety.

#### Plants ready in August, 7/6 each.

Interesting Press Notices of this fine variety will be found on page 16.

Photo]

" MISS CLIBRAN,"

[Clibrans

### "Beauty of Hale."

(See illustration below).

Now offered for the first time.

Salmon, Suffused Rose, Double, 2½ to 3 inches across, in handsome arching sprays, strong upright grower, dark green handsome foliage.

This variety will undoubtedly become one of the most popular, the colour, habit and general character of the plant, as will be seen from the illustration, is pleasing and attractive. It is quite distinct from any other variety.

As we hold a very large stock of this plant we are offering at a very low price.

#### Plants ready in August, 5/- each.

Photo?

"BEAUTY OF HALE,"

Clibrans

Colour of flowers, salmon-rose.

### "Clibrans' Triumph."

(See illustration below).

Introduced in 1908.

Rich Bright Salmon-red, Perfectly Double Flowers, of Camellia-like Form, of even outline, produced in upright sprays. Quite distinct from any other variety.

As we anticipated, when introducing this variety last season, it created a sensation. In many ways it is absolutely unique. In shape and colour of flower there is nothing that in any way approaches "Clibrans' Triumph." The illustration below gives a good idea of the excellence of this variety; note the size and formation of the flowers, also the erect manner in which they are carried well above the bold handsome foliage. "Clibrans' Triumph" is of dwarf weight extractly extractly the state of the size and formation. is of dwarf upright habit, strong, vigorous and free.

#### Plants ready in May, 5/- each.

Photo?

"CLIBRANS' TRIUMPIL."

[Clibrans

Colour of flowers, rich salmon-red.

### 710 "Bank Hall Beauty."

Now offered for the first time.

Salmon-Red, Semi-double Flowers, 23 to 3 inches across, in long elegant sprays, handsome foliage; a free bloomer and good grower.

This variety is of extreme beauty, both in colour, form and general appearance, and well merits inclusion with the best varieties in this lovely new class of plants. We are unable to illustrate it as, unfortunately, we omitted to photograph a plant when in flower.

Plants ready in August, 7/6 each.

#### "Rosy Morn." 865

Now offered for the first time.

Carmine-Rose, a Lovely Colour, Perfectly Double Camellia-like Flowers, 21 to 3 Inches across, freely produced in good sprays; handsome foliage. Although we have not an illustration of this variety available, we strongly recommend it as absolutely distinct and of exceptional beauty in eolour and form. The plant is an excellent grower and a free bloomer.

#### Plants ready in August, 7/6 each.

#### Press Notices on New Begonia "Miss Clibran."

For description and illustration see page 13.

Extract "Gardeners' Magazine," Nov. 23rd, 1907.
"A notable addition to the hybrid Begonias flowering during the winter months. The growth is rather dwarf and free branching, the leaves rieh glossy green, and the flowers comparatively large, double, rose-pink, and freely produced."

Extract "Gardening Illustrated," Nov. 23rd, 1907.

"Begonias of the winter-flowering section were well shown by Messrs. Clibrans;

a splendid, deep salmon-pink flowered variety, named Miss Clibran, receiving an award of merit. The shade of colour is charming, and the plant is free-flowering. The variety should become very popular."

Extract "The Garden," Nov. 16th, 1907.

"A very handsome double-flowered variety, of a pleasing salmon-pink colour,

the flowers being large and the plant abundantly flowered."

Extract "Gardeners' Chronicle," Nov. 16th, 1907.

"A hybrid Begonia, from a cross between a tuberous variety and B. Socotrana.

It is therefore a winter-flowering variety. The flowers are double, rich pink in colour, and very freely produced. Judged by its habit as shown and the finely developed foliage, this plant has an excellent constitution, and is capable of making very free growth."

Extract "

"Decidedly one of the finest winter-flowering Begonias. It is robust, of good habit, and has abundance of large, perfectly double rosette flowers. These are of a bright and pleasing shade of soft rosy-pink, quite distinct from any other variety; the flowers, moreover, are borne in long racemes."

### "Lucy Clibran."

(See illustration below).

Introduced in 1908.

Rose, Suffused Orange, Semi-double Flowers,  $3\frac{1}{2}$  inches across, in long arching sprays. A lovely variety, quite distinct in every way. The large expanded flowers and the handsome foliage give the plant a striking and pleasing character. The illustration below gives a good idea of the variety and its appearance.

#### Plants ready in May, 26 each, 24/- doz.

### Perpetual Flowering, or Evergreen Begonias.

Easily grown, very beautiful, profuse bloomers.

These are most suitable for Greenhouse and Conservatory decoration, they produce their pretty flowers during the Summer and Autumn in profusion. A mixture of loam and leaf-mould, with a little sand and manure, is the best compost. Plenty of water should be given during the growing

Purchasers' Selecton 4d., 6d. and 1/- each, excepting those priced. Our Selection, 12 fine varieties for 3/-.

No.

310 Augustini, beautiful rose, in large heads; very fine, 9d.

315 Boule de Neige, semi-double white, flowers profusely.

- 321 Bronze de Nancy, dark bronzy-green foliage; flowers white, of large size, free. 6d.
- 325 Buisson Rose, beautiful rosy-pink, vigorous, deep green foliage.
- 332 Carminata, bright carmine-pink in clusters, continuous.
- 334 Carrieri, white, tinged rose, excellent winter bloomer.
- 337 Corallina, pendulous trusses of bright
- coral-red, in great abundance.

  339 Corallina "Lucerna," bright coral-red flowers, large size, very free; foliage
- cut, sprinkled silvery-white. 336 Corbeille de Feu, deep rose flowers, in pendulous trusses, excellent habit, very
- 342 Crimson Gem, a very fine crimson flowered variety; wonderfully free blooming. Dregei, syn. Parviflora.
- 354 Fairy Queen, bright rosy-carmine, produced with the utmost freedom. Dwarf habit, admirable for bedding, flowers bright and attractive. -3/- per doz., 20/- per 100.
- 357 Fuchsioides, tall showy species, lovely pendulous trusses of rich waxy scarlet.
- 363 Gloire de Chatelaine, (new) bright rosypink flowers produced in great abundance; a very beautiful free growing new variety. 1/- and 1/6 each.

No.

- 366 Gloire de Jouy, flowers soft silky pink
- 378 Haageana, pink-white flowers, covered with red hairs, the largest heads of bloom measure 1 ft. in diameter.
- 389 Knowsleyana, clusters of silvery blush,
- 394 **Luminosa,** bright dark red flowers, in upright trusses, dark shining green foliage, compact habit, good grower, free.
- 404 Manicata aurea maculata, foliage beautifully mottled green and gold. 6d.
- 410 Moonlight, pearly cream colour; elegant habit.
- 414 nitida, freely produced trusses of fleshcoloured flowers.
- 420 parviflora, small and dainty, in flower and leaf, flowers white.
- 423 Perle Lorraine, pinkish-white, in clusters. Foliage unique, being dark green with dull bronze markings.
- 426 President Carnot, rosy-carmine, fine foliage. 6d.
- 442 Triomphe de Lorraine, semi-double, carmine, a handsome plant.
- 449 **Vernon** (syn. semperflorens atropurpurea and La France), one of the finest, deep red, leaves bronzed.
- 450 Vernon compacta, a very pretty dwarf growing form of the preceding.
- 453 Vesuve, coral-red flowers, in dainty graceful sprays
- 457 Weltoniensis, light pink, very free.

### Rex, or Ornamental Foliage Begonias.

(See Stove Plants, page 79).

### **Bouvardias.**

The Bouvardia is a fine plant for furnishing a supply of flowers, in bloom for six or eight months in the year. The same treatment is required as for Winter-flowering Pelargoniums. Fibrous loam, leaf soil, and sand in equal proportions suits them well with a small quantity of peat.

SMALL PLANTS, PURCHASERS' SELECTION, 4d. each, 3/6 per doz. , , OUR SELECTION, 3/- per doz., 20/- per 100. LARGER PLANTS, in  $4\frac{1}{2}$ -in. pots, 6/-, 9/- and 12/- per doz. PLANTS IN BLOOM in Autumn and Winter, 12/- and 18/- per doz.

- 2 Alfred Neuner, double white, profuse bloomer.
- 8 Dazzler, bright scarlet, free and effective. 14 Hogarth fl. pl., double form of this wellknown variety; scarlet.
- 15 Humboldtii corymbiflora grandiflora, pure
- white, produced freely.
  22 King of Scarlets, A.M., R.H.S., scarletcrimson, white tube, large, handsome trusses, free.

- 25 Mrs. Robert Green, lovely salmon.
- 28 President Cleveland, fine scarlet.
- 27 President Garfield, double pink, profuse bloomer
- 26 Pride of Brooklyn, white, remarkably free.
- 29 Priory Beauty, salmon-pink.
  33 Queen of the Roses, long-tubed, beautiful salmon-rose.
- 36 Vreelandl, pure white, good habit.
- 37 White Bouquet, white, dwarf.

### Caladiums.

Highly ornamental plants, grown for the great beauty of their leaves. They make beautiful ornaments for table decoration, and their suitability for Exhibition is well known. A compost of turfy loam, leaf mould and peat-in equal parts-with a little manure, and a good sprinkling of sharp sand suits them; shade for a few hours in the middle of the day from the sun's direct rays may be necessary, but the more they are exposed to the light at other times during growth the richer and more beautiful will the foliage be.

#### Choice New and Recent Varieties.

No.

14 Aynactui, rosy-cream ground, reticulated green; bright rosy-pink veins; very fine. 3/6 and 5/- each,

18 Bendage, olive-green, blotched white and rose, green veins; striking and effective.

2/6 and 3/6 each.

12 **Dr. Velhena,** dark olive-green, spotted cream; bright rose-red veins. 3/6 and 5/- each.

57 Flor Trabano, centre rosy-pink, reticulated white; broad even margin of deep olivegreen, ruby veins; a superb and beautiful variety. 7/6

- 59 Gireoud, pale emerald-green, spotted rosyred; cream veins; very fine. 3/6 and 5/- each.
- 137 Pintado, cream spotted rose, flushed green; very effective. 2/6 and 3/6 each.
- 143 Rio Claro, cream centre, with an irregular green margin, spotted and blotched white and cream; rose veins. 3/6 each.
- 189 **Werner Meyer,** cream, suffused green; cream veins banded rose; very fine. 3/6 and 5/- each.

#### General Collection.

- margin. 109 **Madame Lemoinier,** pale rose, centre creamy white.
- 136 Perle du Bresil, transparent flesh, veins green.
- 139 Rameau, reddish-crimson, covered with large white blotches, shaded red.
- 146 Roncador, dark rose, green veins, greenishblack ribs; very glossy; a superb variety. 2/6
- 152 Salvator Rosa, scarlet-red, tinted violet rosy-red, green border.
- 156 Silver Cloud, silvery-white, green spots, carmine-red veins.
- 163 Souvenir de Paro, dwarf, deep red, marked yellow, broadly margined green,
- 182 Vesta, greenish-white veins, surrounded with crimson, leaf spotted rose.
- 186 Ville d'Hambourg, rosy-red, netted carmine; a very pretty variety. 2/6
- 190 Wightii, dark green, spotted red and white.

### Calceolarias-Herbaceous.

#### Clibrans' "Gold Medal" Strain.

Our "Gold Medal" strain of Herbaceous Calceolarias is unsurpassed. The plants are of a dwarf and vigorous habit, flowers large in a wide range of colours, from pure selfs to the most finely spotted and blotched forms. Wherever exhibited, our strain has met with the most unqualified approval. Visitors to our Nursery during the flowering season have been astonished by the magnificent display of this favourite flower. Their cultivation is simple. A mixture of equal parts fibrous loam, manure, and leaf soil, with sufficient sand to keep the whole open, is the best compost. On account of the structure of the roots, ramming the compost ought to be carefully avoided, as they should be somewhat lightly potted at all stages. Good drainage is essential, and attention should be given to watering; they must not be allowed to get dry.

in 5 in. pots, from JANUARY ONWARDS, 6/-, 9/-, and 12/- per doz.

Choicest hybridised and selected seed, 1/6 and 2/6 per packet.

### Camellias.

The Camellia is one of our most popular greenhouse flowers. Either "cut" or "growing," most lovers of flowers admire it.

By careful management a succession of flowers can be obtained from October till late Spring. A liberal supply of water is necessary; during the flowering season great care should be taken to prevent the atmosphere or the roots becoming dry, otherwise the buds may fall off.

Purchasers' Selection, 2/6 and 3/6 each, larger 5/- and 7/6 each.

Our Selection of 12 fine Varietles for 24/-, 30/-, 36/- and 42/-, according to size.

Smaller Plants, one and two years grafted, 1/6 and 2/- each, 15/- and 21/- per doz.

No.

1 alba plena, double white.

- 4 Archduchesse Marie, rose-pink, mottled white, imbricated.
- 16 Bealii rosea, bright rose; effective.

19 candidissima, pure white, fine.

- 21 C. H. Hovey, dark velvety crimson, imbricated.
- 23 C. M. Hovey, splendid scarlet, large. 25 Corradino, bright rose, veined salmon, blush-pink centre.
- 33 Fimbriata Alba, pure white, prettily fimbriated.
- 37 Henri Favre, rosy-salmon, finely imbricated.
- 42 imbricata, scarlet-crimson.
- 50 Lady Hume's Blush, flesh, excellent form.
- 54 Leon Lequay, bright red, undulating petals.

No.

- 61 Marie Morren, bright carmine.
- 65 Mathotiana, rich crimson, large, imbricated
- 68 Mathotiana alba, white, finely imbricated.
- 73 Princess Bacciochl, rich carmine, very striking
- 76 Princess Charlotte, pure white, extra fine.
- 82 reticulata, a rare Chinese species, large, bright rose; semi-double, one of the loveliest and freest blooming of Camellias; small plants, 2/6 each; larger, 3/6 and 5/-
- 90 Sasanqua, a Chinese species, blush-white single flowers
- 94 Souv. de François Vandame, deep crimson; very rich.

### Cannas.

#### Gladiolus-Flowered Varieties.

The spikes resemble Gladioli, and the brilliant colours show grandly against the tropical-like foliage; they bloom continuously during summer. The foliage comprises shades of rich green, glaucons, and chocolate-crimson tints, giving a beautiful tropical aspect to pleasure grounds. When planted in groups on lawns, or in centres of beds-in warm or sheltered situations-they form effective objects during the Summer months; they are also fine for conservatory decoration, and can be kept flowering during the Winter.

Cannas are entirely free from insects and diseasc. After flowering they may be treated similarly to Gladioli or Dahlia tubers.

During Winter and until March they are supplied as dry tubers; after March, as growing

Young Plants, our selection, 4/6 and 6/- per doz.; larger 9/- and 12/- per doz. Purchasers' Selection, 9d. each, 7/6 per doz.; larger 12/- and 15/- per doz., except those priced.

- \*366 **Rhea,** cherry-carmine, very striking and attractive; vigorous and free.
- 373 **Suevia**, banana-like leaves, large satiny canary-yellow flowers.

Seed, choicest mixed, I' per pkt.

### Clibrans' Malmaison Carnations.

The Most Popular of All Classes of Carnations.

The great popularity of these lovely Carnations illustrates in a remarkable manner the results attendant upon skilful crossing and careful selection for the purpose of raising new varieties. Until a few years ago the number of varieties was limited; in fact, excepting the old blush flowered Souvr. de la Malmaison, many people were unacquainted with Malmaisons. Now, we have a wide choice of colours from pure white to deep crimson, with delightful shades of rose, pink, cerise, salmon, scarlet, &c. All the flowers are of large size with stout petals, many of them possessing a delicious fragrance.

Our plants in small pots, from October to April, 6/- and 9/- per doz. Young plants in small pots, from October to April, 6/- and 9/- per doz.

Write for our special List of Carnations; it contains a full and descriptive list of Malmaisons, together with cultural directions.

PERPETUAL-FLOWERING CARNATIONS.

[Clibrans

# Tree, or Perpetual-Flowering Carnations. English and American Varieties.

The many gloriously beautiful Tree Carnations, embracing white, yellow, pink, cerise, scarlet and deep crimson, with charming intermediate shades, and the remarkable freedom with which they produce their flowers, render them invaluable for greenhouse cultivation, particularly as they bloom during winter, when flowers are so acceptable. As decorative plants or for cutting they are equally useful; for the latter purpose the blooms are always in demand for buttonholes, bouquet making, &c. Many varieties possess a rich fragrance.

Young Plants, our Selection of Varieties, 4/6 and 6/- per doz.; larger 9/-.
Blooming Plants, 12/- and 18/-.

Write for our List of Tree Carnations; it contains a full description of our choice and comprehensive collection.

Post free on application.

### Celosia Clibrans' "Gold Medal" Strain.

For Greenhouse and Conservatory decoration the Celosia is very fine; our strain, the result of many years' selection, is famous for brilliancy of colour, size of plume, and good habit. Pale to deepest yellow, red, scarlet, and deep crimson are the prevailing colours.

Strong Plants established in 3-in. pots 3/- per doz., ready in May; later, when potted on, we can supply at 6/- per doz., and blooming plants 9/- and 12/- per doz.

Seed, our own strain, red, yellow, or mixed, 1/6 and 2/6 per pkt.

### Chrysanthemums.

The above illustration is that of the cover of our Chrysanthemum List for the present season. It is without doubt the neatest, most convenient, and most comprehensive List published. A copy will be gladly sent free on request.

Prices:-Young plants of Japanese, incurved, single, early-flowering and other classes, Our Selection, 2/6 per doz.; 18/- per 100. Purchasers' Selection, 4d. each, 3/- per doz. except where specially priced.

From April onward, plants in 5-in. pots, 5/-, 6/- and 9/- per doz.

From June, plants in flowering size pots, 12/-, 15/-, 18/- and 24/- per doz.

Chrysanthemums have been a speciality with us for a number of years. The display made during the Autumn, when the plants are in bloom, is one of the remarkable sights in our nurseries, and always enjoyed by numerous visitors who make a point of seeing them yearly. Each season, in addition to the choice new varieties raised by us, we make a selection of the best new varieties from English, Australian, American, and Continental sources, so that our customers may rely upon having the best of the newer varieties, and all the older varieties of tested excellence.

> Gold and Silver Medais, Certificates and Awards have been accorded to our Exhibits at the Leading Shows In Great Britain.

Photo

[Clibrans

One of our Single-flowered Chrysanthemnms.

### Clibrans' "Gold Medal" Cinerarias.

Unsurpassed for size of flower and brilliancy of colour.

Our strain of Cinerarias is famous. The plants are characterised by a dwarf, vigorous, robust growth, they bloom with the greatest profusion, and the flowers are of large size, with individual petals of stout substance. The colours are very rich and as varied as can be found in the family.

petals of stout substance. The colours are very rich and as varied as can be found in the family.

Perhaps no plants make such a splendid display in the greenhouse and conservatory in the early part of the year as Cinerarias. They are easily cultivated if grown in a rather damp and cool place, taking special care to keep them free from insect pests, which can easily be done by fumigation.

Seedling Cinerarias from stores, from July to October, for potting on, 12 for 1/6, 30 for 5/100 for 8/-; in 3-in. pots, from September to end of November, 2/6 per doz., 17/6 per 100.

Fine plants in 5-in. pots for blooming in the Spring, 6/-, 9/- and 12/- per doz.

CINERARIA SEED, Clibrans' "Gold Medal" strain, 1/6 and 2/6 per pkt.

Photo] CINERARIA STELLATA, (Clibrans' "Gold Medal" Strain), [Clibrans

### Clibrans' "Gold Medal" Cineraria Stellata.

 $\Lambda$  quite distinct class of these levely plants; of tall habit, with large heads of small star-shaped flowers in a variety of colours; vigorous in growth and profuse in bloom.

Prices same as the large flowered class. See above. **Seed**, saved from specially selected flowers, 1/6 and 2/6 per pkt.

### Coleus.

Highly ornamental soft-wooded plants for Conservatory decoration. The chief requisite in their cultivation in Spring is warmth. If they can be accommodated in a warm frame or stove in March, April, or May, they will do well in Conservatory or Greenhouse for the remainder of the Summer, and their foliage and diversified colouring contrasts well with other plants. A compost of turfy loam, leaf-mould, manure, and sand is suitable.

Purchasers' Selection, 4d. each, 3/- per doz, excepting those priced; Our Selection, 2/6 per doz.

Cuttings, two-thirds that of plants.

Large Plants in  $4\frac{1}{2}$  and 5-in. pots, 5/-, 6/- and 9/- per doz.

No.

- 1 Adrien Schmitt, spotted red, yellow, green and brown.
- 4 Attraction, green, blotched rose, leaves deeply cut.
- 6 Chameleon, a beautiful combination of maroon, crimson, carmine and green, narrow gold margin.
- 7 Conrad Rosenthal, blackish-maroon, deep green and yellow; very fine.
- 10 Cordelia (new), bronzy terra-eotta, a very distinct and pretty variety with rugged leaves. 1/6.
  - 11 Grimson Gem, rich crimson-red, a strikingand effective broad-leaved variety.
- 13 Duchess of Manchester, carmine-pink centre, banded gold, pink margin; very pretty.
- 14 **Duneira**, very striking and beautiful; foliage coloured with various shades of rich crimson, giving a brilliant effect; a magnificent variety. 6d.
- 15 Edith Sentance, bright crimson, banded blackish-purple.
- 17 **Emperor,** a very beautiful mixture of maroon, carmine, crimson, yellow and green.
- 20 Fimbriata, rich crimson, with narrow fimbriated gold margin; very fine.
- 23 Golden Gem, a beautiful rich golden broadleaved variety.
- 26 Hart's Conqueror, dark chocolate-maroon, rosy-red centre, blotched cream.
- 34 Lord Alverstone, buff-yellow, mottled purple and green.

Νo.

- 36 Lyons, a beautiful new yellow variety, with handsome markings; distinct and highly attractive. 6d.
- 42 Miss Rosina, light green, mottled yellow, blotched crimson.
- 53 Mrs. Potter, rich creamy-yellow, margin green.
- 55 Mrs. R. H. May, golden-green ground, heavily splashed and marked purplish-red
- 60 Mrs. Skinner, light green, mottled deep maroon, veined bright rosy-purple, and flaked creamy-white.
- 69 President Kruger, rosy-crimson centre banded deep maroon, margined bright green, very striking and effective. 6d.
- 72 **Sensation**, large crimson-maroon foliage, with a light-red centre; a very fine striking and effective variety. 6d.
- 76 **The Shah,** erimson and gold, with golden margin.
- 71 **Thyrsoldeus,** F.C.C., R.H.S., blue flowers, in long racemes; grown in an intermediate or warm greenhouse it makes a splendid display in winter.
- 74 **Triomphe de Luxembourg,** exquisitely coloured in a variety of shades.
- 79 Verschaffeltii, rich crimson, fine for bedding. 2/6 per doz., 15/- per 100.
- 81 **Vesuvius**, dark vermilion, clouded-maroon, edged bright yellow; olive-green shading.
- 89 Winnie Bazeley, golden, shaded green and delicately mottled maroon.

SEED, saved from finest varieties, specially selected, 1/- and 1/6 per pkt.

Extract—Journal of Horticulture.

### Clibrans' Cinerarias.

Repeatedly have we been moved to mention, in terms of praise, the highly developed strain of greenhouse Cinerarias grown by Messrs. Clibrans at their Hale Nurseries, by Altrincham. We are confident that no finer strain exists, for the plants are bushy, shapely, branching, bearing crowds of large, smooth-petalled, velvety flowers. Blue, white, and various shades of purple and crimson are the colours mostly in evidence; but some pretty shades of pink and old rose have lately been developed. The warm deep glowing hues are a rich feast in the early days of spring. Combined with multi-colours and thick smooth petals, the flowers are large, spreading, and round. Size is indeed a great point, and the diametrical measurements in some individual blooms are  $4\frac{1}{2}$  in. and 4 in., while the great majority are  $3\frac{1}{2}$  in. and over. But better than descriptions would be to see the plants themselves; and Messrs. Clibrans would doubtless be very pleased to welcome visitors.

### Crotons (Codiæms).

For brilliancy and variation of colouring, there are probably no foliage plants that can equal the Crotons. The varying width of the leaves, from extremely narrow, through medium

to broad, together with the fact that many of them are beautifully twisted, arching and pendulous, whilst others, particularly the broad-leaved varieties, are of stiffer habit, give these lovely plants a great variety of character. As decorative plants for the Stove, for Table Decoration and Exhibition, the Croton occupies a high position.

A stove temperature, with abundance of atmospheric moisture, is required to grow these plants. They should be potted in good fibrous loam with sufficient sharp silver sand to keep it open. Grow in the lightest part of the house and syringe frequently. When intended to be used for table or conservatory decoration they should be gradually hardened, as any sudden change may cause the leaves to drop.

We make a speciality of Crotons, our collection embraces the finest and richest coloured varieties yet introduced.

## Cyclamen Persicum (Giganteum Strain).

Awarded "Gold Medals" at several shows.

Our strain of this beautiful plant is unsurpassed. The flowers are enormous, borne well above the foliage, and of the brightest shades of colour. For profuseness of bloom, combined with robust growth, this strain is unrivalled. The illustration (from a photo), gives a good idea of the character of the plants and their free blooming qualities. Few plants are better adapted for Winter and Spring decoration.

"CYCLAMEN," Photographed in our Nurseries.

[Clibrans

Plants in 3 in. pots, from April to end of June, 2/6 and 3/6 per doz., 18/- and 25/- per 100; larger plants in 5 in. pots, 6/- and 9/- per doz., 40/- and 60/- per 100

In Autumn and Winter plants in bud and bloom, very fine, 12/-, 15/- 18/-, and 24/- per doz. 90/- and upwards per 100

Young plants from boxes, mixed colours, from February to April, 1/6 per doz., 10/- per 100, , , , , selected to colour, , , , , , 2/- ,, 12/- ,, Seed saved from the finest selected flowers of our "Gold Medal" strain, hand fertilised, 1/6 and 2/6 per pkt.

### Dracænas—Stove Varieties.

For Greenhouse varieties see page 56.

Dracænas are remarkable for their richness of colonr. The narrow-leaved varieties are great favourites and are extremely beautiful for table decoration. The broader foliaged sorts are highly effective for groups and similar purposes. The varieties enumerated below require the temperature of a stove and should be grown and treated as recommended for Crotons, see page 32. Fibrous loam, lumpy peat, with a little sand and charcoal, forms the best compost.

DRACÆNA, "DUCHESS OF YORK."

[Clibrans

Prices: Purchasers' selection, except where otherwise stated, 1/6, 2/- and 2/6 each, according to size.

Our selection, 12/-, 15/-, 18/- and 24/- per dozen.

No.

Each-s. d.

- 1 A. Laing, graceful drooping leaves, brilliant crimson ... 2/-, 2/6 to 3 6
- 9 Augustata, similar to Sydneyi, but stronger grower.
- 12 Argentea striata, hoary green, white markings the whole length of the leaf; pretty variety.
- 28 Cooperii, elegant variety, deep vinous-red gracefully recurved.
- 31 Duchess of York, leaves 10 in. to 15 in. long, older ones olive-green with bright carmine margin; younger ones light green, creamwhite margin, tinted rose-pink.

No.

Each-s d 38 Edmontoniensis,

rich crimson; ... 2/-, 2/6 to 3 6 long, narrow

- 50 Excelsior, dark bronzy-green, with bright rose-coloured margin; the leaves are narrow, long and beautifully recurved; a very pretty, elegant and effective variety. ... 2/-, 2/6 to ... 2/-, 2/6 to 3 6
- 51 Exquisite, varying in colour from creamy-pink to deep red.
- 54 Frederici, bronzy-green, margined pink, narrow, highly decorative.
- 59 Goldieana, banded dark green and silver-grey in alternate bands

2/6 to 5 0

#### Dracænas (Stove Varieties)—continued.

Each—s. d.

61 Gracilis, a fine table plant.

63 Haroldiana, green, margined white, young leaves striped white.

66 Hendersonii, green, striped cream and pink.

72 His Majesty, bright crimson, bold

Each—s. d.

105 Miss Glendenning, very narrow-leaved form; green, edged carmine-rose ... 2/-, 2/6 to 3 6

72 His Majesty, bright crimson, bold and striking.

115 Princess Charies of Denmark, margined ivory, flushed rose, deepening to carmine-rose.

75 Hybridus, dark green striped pink and cream.

118 Princess May, narrow, bronzy-green, margined red; splendid decorative variety ... 2/-, 2/6 to

narrow, pure white margin, most graceful habit. One of the most graceful and lasting room plants, and unsurpassed as an Exhibi-

125 **Sidneyi,** narrow pink foliage, excellent for table decoration.

126 **Superba,** narrow leaves, finely coloured ... ... 2/- to 2

128 **Terminalis,** olive green, striped carmine and pink; young leaves almost entirely pink.

130 **The Queen,** narrow graceful foliage, deep green shaded salmon, margined bright carmine, 2/- to 3

136 Victoria, F.C.C., R.H.S., leaf bright golden-yellow with central band of green, streaked greyishwhite; bright and constant; the golden-yellow colour becomes deeper with age. 10/6 upwards.

139 **Vivicans,** bronze-red and olive green, margins bright red.

tion variety ... 3/6, 5/- and 86 **Jamesii**, young leaves carmine-crimson deepening with age to blackish green, except at the margins; older leaves bronzegreen, bordered carmine,

89 **Kewensis**, deep green leaves, distinct from any other *Dracæna*, of great value for decorative purposes, being strong and hardy. ...

92 **Lindenii,** beautifully variegated, with bands of pale yellow, 2/6 to 3

93 Lord Wolseley, graceful variety; young leaves crimson-carmine, older bronzy-green, crimsoncarmine border.

99 Mayli, bright crimson; effective even when small.

## Epiphyllums.

A fine class of Winter-blooming Stove or warm Greenhouse Plants, for table and conservatory decoration. The beautiful form and brilliant colours of the flowers, freedom of blooming, and easy culture, make them desirable decorative plants. The flowers are produced at the ends of the singularly-formed leaves. They are best grown as standards, as the stem is then encircled with the pretty drooping flowers, and the effect much enhanced.

#### Purchasers' Selection, 2/- and 2/6 each, 21/- and 24/- per doz., according to size; Our Selection, 18/- per doz.

1 Mokoyanum, bright red, vigorous.

3 Russellianum Gaertneri, bright scarlet, free.

11 Truncatum aurantiacum, orange, red and purple.

14 -- coccineum, rich deep scarlet.

18 — E. Madlain, orange-red, light centre, one of the best.

31 — Mr. Beile, scarlet and white, pretty and distinct.

No.

21 Truncatum la Vesuve, bright scarlet.

22 — magnificum, large white, tipped

25 — Mons. E. Andre, bright purplish-rose.

40 — Ruckerianum pallidum, light purple and violet.

37 — roseum amabile, white, edged rose.

44 — saimonium flavum, salmon-yellow.

49 --- violaceum purpureum, violet-purple

Varieties with the initial "s" placed before the number require Stove treatment: varieties not marked are suited for Greenhouse cultivation.

### Ferns.

#### Stove and Greenhouse Varieties.

These are indispensable decorative plants, and their beauty in contrast with flowering plants is well-known, their popularity is ever increasing. For Stove and Greenhouse or table and room decoration they are of great value, their elegant and graceful habit giving a pleasing effect. They are also invaluable for margins of paths, under stages, or corners, where frequently other plants have failed.

## Choice New Forms of Nephrolepis.

The following varieties are very beautiful and interesting breaks from the ordinary type. Their striking character consists in the exquisite way in which the divisions of the fronds are further sub-divided until the whole assumes a beautiful plume-like form.

- 419 Amerpohli (Award of Merit, R.H.S., 1908), a dwarf growing variety, of exceptional beauty, with soft feathery fronds abundantly furnished with small pea green pinnules; an exceedingly pretty and valuable new variety. Small plants 1/- and 1/6 each; larger, extra fine, 3/6 each.
- Todeaoides, F.C.C., R.H.S., and R.B.S., a very beautiful variety producing fronds three feet in length, and fully twelve inches broad in their widest part; the leaflets are tripinnate, divided to the mid-rib, with their second leaflets inclining or twisting a little out of the surface of the frond. The third leaflets are distinctly curled, giving the whole of the large fronds a light and airy appearance. Strong young plants, 1/- each; larger, extra fine, 3/6 and 5/- each.
- 429A Whitmani, A.M., R.H.S., a very beautiful sport from N. Fosteri, the fronds are beautifully tesselated and of a rich green colour; vigorous grower. Small plants, 1/- and 1/6 each larger, extra fine, 2/6 and 3/6 each.

## Japanese Fern Balls "Davallia Bullata."

These are pretty novelties in Ferns from Japan. The balls or designs should be immersed a few hours in tepid water, and then hung up in the Greenhouse. They require to be soaked once or twice a week, and in a short time produce a mass of fronds that cover their entire surface.

We can supply balls or rings in a dry state without fronds, 1/-, 1/6, and 2/- each. Other

designs can be supplied at various prices.

## Selaginellas for Greenhouse and Stove.

Twelve in 6 varieties, our selection, 3/- For planting on indoor rockwork, 15/- and 21/- per 100.

Varieties that require Stove treatment have the letter "s" placed before the number.

No.	Cæsia (uncinata) Each.—s			No. Each.—s. d. 728 lepidophylla (The Resurrection
713	circinalis (cuspidata) 6d. & denticulata (helvetica vera), 3/- per doz.	0	9	Plant), a great curiosity. The stems of the plant when dry roll up into a ball, and the plant can
720	densa (apus) 3/- per doz	0	4	be laid away and kept in a dry state for months, apparently dead; but when placed in water
	Emeliana, colour         beautiful bright green             4d., 6d. & filicina             9d. & filicina	1	0	they, in a few hours, unfold, and become as green and beautiful as if they had been growing all
727	grandis 9d. & Kraussiana aurea 4/- per doz.	0	6	the time. They grow without soil dry plants, 9d. & 1 0
	Martensii (formosa)         6d. &           variegata         6d. &			740 <b>stolonifera</b> 0 6 6 744 <b>Wildenovi</b> (pubescens) 9d. to 1 6

Varieties not Catalogued can be supplied.

### Figs.

Best Fruiting Varieties. For List and full descriptions, see our Fruit Catalogue.

Bushes in pots, 2/6, 3/6, 5/-, 7/6 and 10/6 each. Small plants, 1/6 each.

A few extra-sized specimens, sizes and prices on application.

A limited number of plants can be supplied trained flat, for walls, &c., at 5/- and 7/6 each.

### Fuchsias.

Owing to their easy culture and beautiful flowers are favourites generally. Easy to grow, beautiful when in bloom, the Fuchsia is a valuable decorative plant. A temperature of 60° with a rise by sun heat, is suitable, a good supply of water should be given, with a syringing in the morning and afternoon. Plenty of air and a light shading are necessary in Summer, particularly when flowering. They succeed well in a mixture of two parts loam and one of good manure, well mixed and used in a lumpy state.

#### New Varieties.

Price, 1/- and 1/6 each.

No.

- 3 Admiral Evans, sepals rosy-white, corolla silvery-lilac, clear and bright; a very pretty single-flowered variety.
- 5 Alfred Neymarck, a large double-flowered variety, with coral-red sepals and purple corolla; petals large and stout; very fine.

No.

- 73 **Colonel Branlieres**, reddish-carmine sepals of large size; rich violet-purple corolla; a very fine large double-flowered variety.

- 127 Etoile Plante, bright scarlet; very fine.
- \*157 Herbert Greenhill, pale blush-pink.
- \*187 J. R. Greenhill, slightly darker in colour than the preceding.

### Single Geraniums.—Zonal and Nosegay.

These are of the utmost value for Conservatory decoration during the Summer and Autumn, and if properly grown, furnish gorgeous flowers in Winter, and none can fail to appreciate them for decorative purposes from October to January, a season when (excepting Chrysanthemums) there are no plants of easy culture to furnish flowers. Considering their low price, their simple cultural requirements, freedom from insect enemies, and yet strikingly gorgeous appearance and usefulness for cut flowers, as Winter blooming plants they are indispensable.

Plants intended for Winter decoration ought to be grown on during the Summer for that purpose alone. They ought not to be allowed to waste their strength in blooming in Summer or early Autumn. All the buds should be removed, the plants grown in pots out of doors, carefully attended to for water, and the wood ripened in August or September; then remove to a cool, airy house, and a few weeks before bloom is wanted place them in a temperature of 50 to 60 degrees.

The Prices are for young plants, generally in 3 in. pots. Purchasers' selection, 4d. each, 3/6 per doz., except those priced.

Twelve varietles, our selection, for Pot Culture, 2/6, 3/6 and 6/– Twelve varietles, our selection, for Winter Blooming, 2/6, 3/6 and 6/– Larger Plants of many varieties in  $4\frac{1}{2}$  or 5 in. pots, 6/– and 9/– per doz.

Our selection of 50 very choice Geraniums from all classes. Tricolors, Bicolors, Zonals, &c., for 15/- in 50 sorts; Collections of 100, in 100 sorts, for 31/6. Our selection of 50 very choice Geraniums for Pot Culture, for 15/-. This is a fine collection for a display of flowers in Summer and Winter, if grown on. Price for cuttings two-thirds that of plants.

No.

989 denticulata major, rich citron perfume; prettily-cut foliage.

991 Fair Ellen, oak-leaved, very fragrant.

993 Fair Rosamond, oak-leaved, charming

998 Lady Plymouth, pretty variegated foliage. 1006 Prince of Orange, delicious orange

fragrance. 1009 Scarlet Unique, dark scarlet, blotched maroon, excellent for walls.

## Clibrans' Superb Erect Flowering Gloxinias.

Gloxinias are extremely beautiful. By successive potting they flower throughout the greater part of the year, thriving best in a compost of loam, peat, leaf-mould, and sand, and a moist, warm atmosphere, free from cold draughts. Start the bulbs in March and April, in a warm house, and apply weak liquid manure, once or twice a week, when growing freely. Shade from sunshine After blooming, gradually withhold water, and store away in a dry moderately warm place, care being taken that no damp reaches the bulbs.

Photo] CLIBRANS' SUPERB GLOXINIAS. [Clibrans

Special care has been bestowed on our strain of Gloxinias for many years past. The flowers are remarkable for their upright habit, large size, and the depth and intensity of their colouring Both self colours and spotted forms are unusually fine. As a consequence of this, we have ceased to grow named varieties, as we find the blooms are finer in every way when raised direct from seed

Strong Young Plants In April in a choice selection of colours, 6/- per doz.

Mixed Seedlings, unbloomed, 4/6 per doz. Large Plants In bud and bloom, later in the season, extra fine, 12/-, 15/- and 18/- per doz.

Dry Tubers (prices as young plants) can be supplied from October to March.

Seed, saved from selected flowers, 1/6 and 2/6 per packet.

## GREENHOUSE PLANTS. Novelties and New Varieties.

## "Calceolaria Clibrani,"

A Distinct and Beautiful Plant for Greenhouse and Conservatory Decoration.

CALCEOLARIA "CLIBRANI." Photo]

This new Calceolaria has more than justified the high opinions we expressed concerning it, when we first introduced it last season. From the latter part of spring, throughout the whole of last summer, a batch of plants in one of our houses, was a mass of bloom, and proved a source of great delight to all who saw them.

The plant is of shrubby habit, strong and vigorous in growth, and produces an abundance of beautiful lemon-yellow flowers. This is well seen in the above illustration.

The foliage, 5 to 6 inches in length, is ovate lanceolate in form, with prettily cut and indented margins.

The flowers are of large size, lemon-yellow in colour, produced in fine heads.

The plant roots readily from cuttings put in during the Autumn, when in growth they may be stopped once or twice, according to the height the plants are required to attain; they will flower in June. After flowering, if cut back, the plants may be grown on for a second year, when they will make large bushes and produce an immense amount of flowers. We strongly recommend this plant as an excellent subject for a cool house.

In view of the heavy demand we experienced for this plant last season, we should appreciate

orders being placed early.

STRONG PLANTS IN 5 INCH POTS, TO FLOWER THIS SEASON: 1/6 EACH. 12/- & 15/- PER DOZEN.

Greenhouse Plants, Novelties and New Varieties-continued.

## "COREOPSIS GRANTII."

Produces an abundance of rich orange coloured flowers from December onwards.

Coreopsis Grantii is a valuable introduction from Central Africa.

In height it varies from I to 2 fcet, is of bushy habit, and has rich green, beautifully cut and laciniated foliage, resembling in some degree the finely cut foliage of some varieties of Chrysanthemums.

The flowers are single, somewhat star-shaped, averaging 2-2½ inches across, colour bright orange-yellow of a wonderful richness.

The plant is a free grower and wonderfully profuse in bloom, commencing in December and continuing until March.

It is easily propagated from cuttings; the plants during the Summer may be placed out of doors. During Winter, the Greenhouse or Conservatory suits it well.

# STRONG YOUNG PLANTS IN $3\frac{1}{2}$ in. POTS, 1/6 and 2/- each; 15/- and 21/- per doz.

Photo] [Clibrans

**CULTURAL NOTES.**—Plants suitable for Greenhouses thrive best in a temperature of 40 to 50 degrees in Winter. All the Soft-wooded Plants of this Section need supplies of weak liquid manure, or a top-dressing of artificial manure, such as our "Ideal" Fertilizer, as soon as they are well established in the pots, if free and continuous bloom is required. The Hard-wooded Plants mostly require peat, leaf-soil, and sand, with a little well-rotted old manure, and do best in the coldest and most airy part of the house. The Soft-wooded Plants require rotted turf, old manure, leaf-mould, and sand, and do best in the warmest part of the house. If either class is wanted for Winter bloom, 10 to 15 degrees more heat is required than is needed to keep them in health without bloom, and a drier atmosphere is essential. From June to September Hard-wooded Plants do well in a cold frame or behind a north wall or fence, if attended to for water, and kept quite free from insects. Soft-wooded Plants at this time are mostly in bloom. The house should be well ventilated, and slightly shaded from strong sunshine. Furnigate or syringe with some insecticide before the insects appear.

#### General Collection.

Twelve Fine Varieties of Greenhouse Plants, 6/-, 9/-, 12/- to 18/-

Photo] CLIBRANS' SUPERB AMARYLLIS. [Clibrans See page 54,

Chilmana

- ABUTILONS, handsome pendulous flowers, in various colours; require treatment similar to Fuchsias; turfy loam, peat, leat mould, and old manure suit them well. Price 4d. each, larger 6d, and 9d. each.
  - —Boule de Neige, white, exquisite. —General Gallieni, rich crimson,
  - striking.

    Golden Bells, bright yellow, one
- of the best.
- Jules Paquet, rich fleshy rose.
  La Fournaise, bright crimson.
- Lemoineii, beautiful pale yellow.
- L'Africane, rich crimson.
- -Princess of Wales, pink, veined rose.
- Seymour, rose-pink, darker veins.
  Triomphe, rose, veined salmon, very large.
- -Triomphe de Quedlinburg, foliage ivory and green, dwarf, but free.
- Thompsonii, foliage mottled bright yellowish-green.
- Vexillarium variegatum, foliage green, and ivory white.
- ACACIA, the so-called Mimosas: require firm potting, abundance of water in Summer, and severe pruning soon after flowering.
  - **affinis,** feathery foliage, yellow flower. 9d. and 1/-
- —armata, globular lemoncoloured flower beads. 6d., 9d., and 1/
  - cordata, creamy-white in groups of four from every leaf. 1/6 to 2/6 dealbata, feathery foliage.
- grandis, bright yellow. 1/6 to 2/6.
- longifolia magnifica, large globular yellow flower heads. 1/6 to 2/6
  - platyptera, large yellow flowers in mid-winter. 1/- to 1/6
  - -pubescens, lovely foliage, profuse bloomer, yellow flowers, in long handsome spikes; one of the best. 2/6.
  - **Riceana,** profusion of globular pale lemon flowers. 1/- and 1/6.

ACACIA verticilata, yellow in loose spikes, in March. 1/- and 1/6
AGAPANTHUS umubellatus (the African Lily),

AGAPANTHUS umubellatus (the African Lily), bright blue; rich compost, and abundance of water in the growing and flowering season, and rest during the Winter. 1/- and 1/6

— albus, pure white. 1/- and 1/6
 — fl. pl., double blue, distinct. 1/- and 1/6

-- varlegatus, foliage striped white.

AGATHÆA collestis, blue Marguerite-like flowers, 4d. and 6d. each, 3/6 per doz.

ALBERTA magna, panicles of bright red, succeeded by beautiful fruit. 1/6 and 2/6

ALOYSIA citriodora, lemon-scented Verbena; prune severely in the Spring. 4d. and 6d.

Standard plants on 18 in. to 24 in. stems, with nice heads, 2/6 and 3/6 each.

AMARYLLIS equestris, orange-scarlet, white throat, band of white down each petal. 1/6

--Johnsonil, deep red, white stripes. 2/6

purpurea (see Vallota purpurea).

Seedlings, splendid flowers, brilliant colours, extra selected, from large-flowered named sorts. Per doz, 18/- and 24/-Each, 2/6

Seedlings, specially selected to colour, extra fine (see illustration, page 53). 2/6. 3/6 and 5/-

**AOTUS gracillima,** long graceful spikes of closely set yellow and crimson pea-like flowers in early Summer. 2/6

ARALIA Sieboldii (Fatsia Japonica), large handsome glossy foliage. Fine room plant. 4d., 6d. and 9d.

Photo]

ARAUCARIA EXCELSA. A lovely decorative plant.

[Clibrans

**AMARYLLIS** (Hippeastrum), large, handsome bell-shaped flowers; loam, leaf mould and well-rotted manure, suit them best; water freely when in growth. After flowering, gradually dry the bulbs off and allow to rest.

-aulica, large brilliant crimson. 1/6

-Belladonna, delicate silvery rose. 1/- and 1/6

- major, dark rose and white. 1/- and 1/6

dark crimson. 9d. and 1/-

ARALIA Sieboldii Moserii, an improved form of closer and more compact habit. 6d.

ARAUCARIA excelsa, the beautiful Norfolk Island Pine; splendidly decorative for rooms (see illustration). 1/6, 2/-, 2/6 to 7/6 each.

ARDISIA crenulata, produces a number of bright red berries during the winter. 9d., 1/- to 1/6

ARUM sanctum, the Black Calla, rich velvety black-purple, distinct. 9d. and 1/-

ASPARAGUS Myrlocladus, beautiful non-climbing species, with deep green leaves; whilst preserving the graceful character of the Asparagus, this is closer and more dense; for basket, pot, or decorative work it is unsurpassed. 2/6 and 3/6

**ASPIDISTRA** lurida, popular house plants, graceful evergreen leaves; likes a rich soil and plenty of moisture. 1/6, 2/6,

and 3/6

-var., leaves striped green and white, a lovely plant (see illustration, page 56). 2/6 to 3/6

AZALEA amœna, bright rosy-purple. 1/- and 1/6 -Caldwelll, larger and brighter than

preceding. 1/- and 1/6

— Duke of Connaught, semi-double bright reddish-crimson, fine for forcing. 1/- to 1/6

-Emblem, magenta-crimson, bright

spots. 1/- to 1/6

-Mrs. Gerard Leigh, bright rosyscarlet. 1/- to 1/6

Hexe, deep rich red flowers, free; its habit and constitution will undoubtedly make it very popular. 1/- and 1/6

Indica, in variety, best sorts, illustration, page 3). 2/-, 2/6 to 3/6

BEGONIAS, tuberous. See pages 4 to 8.

BORONIA, elegant Spring-flowering plants, small shallow cup-shaped flowers; of easy culture; the strong growers require frequent pinching; beautifully fragrant.

elation, rosy-carmine, fragrant. 1/6 to 2/6 -heterophylla, dark rose, graceful. 1/6

to 2/6

megastigma, maroon-purple, mustard-yellow inside; fragrant. 1/-, 1/6 to 2/6 megastigma,

BRUGMANSIA, large trumpet-shaped flowers; bears severe pruning well.

-arborea, white, 8 in. long. 1/6 to 2/6

coccinea, large brick-red flowers. 1/6 to

Knightii, double white, does well in sheltered positions outside in Summer. 1/6 to 2/6

CACTI, choice and distinct sorts, our selection. 9/- and 12/- per doz.

CALCEOLARIAS (herbaceous). See page 25.

CALCEOLARIA Burbidgei, a handsome hybrid between C. Pavonii and C. Fuchsiæfolia; flowers rich yellow, with a large, bold lower lip; a very beautiful plant for the greenhouse, flowering during autumn and winter. 6d. and 9d. each.

Standards, 3½ ft. to 4 ft. stems, good heads. 2/6 each.

-Clibranii. (See New Plants, page 51).

CALLA.

-Elllottlana, spathes intensely rich gold, foliage green, spotted white, a first-class greenhouse plant. One-year-old bulbs, 6d. each; two-year-old bulbs, 9d. and 1/each; flowering bulbs, 2/6 to 3/6 each.

Pentlandii, spathe bright golden yellow, with a blotch of crimson at the base. One-year-old bulbs, 6/- per doz.; two-year-old bulbs, 1/-; flowering bulbs, 2/6 and 3/6 CALLA Taylori, handsome hybrid Calla, leaves spotted silver, primrose flowers. Small plants 1/6; flowering size, 3/6

CALLIANDRA Tweedel, elegant tufts of rich crimson. 1/-, 1/6 and 2/6

CAMPANULA pyramidalis, large handsome blue 6d., 9d. and 1/flowers.

-alba, the white form (see illustration,

page 57). 9d. and 1/isophylla, flowers 2 in. across, salver shaped, lilac-blue with grey centre; excellent for hanging baskets for windows. - ---alba, pure white, very free. 9d.

Balchiniana, broad creamy-white margined leaves, having a green centre.

lovely blue flowers. 1/-

-Mayi, pale lavender-blue, pretty bellshaped flowers, produced with wonderful freedom. It makes a fine basket plant, and will also climb well. A.M., R.H.S.,

Versicolor, an interesting species, producing blue flowers with a black centre.

1/- and 1/6 each.

CANTUA dependens, a pretty evergreen greenhouse shrub, producing pale red tubular flowers in corymbs at the ends of the branches. 1/6

CAREX japonica variegata elegantissima, leaves beautifully margined white; showy and elegant. 9d. and 1/-

CASSIA corymbosa, yellow pea-shaped flowers.

CELOSIA pyramidalis. (See page 29).

CHIRONIA ixifera, charming rose-pink; ornamental. 1/6.

CHOISYA ternata, the Mexican Orange Flower, a handsome almost hardy evergreen, deliciously scented white flowers. 6d., 9d. to 1/-

CHOROZEMA, graceful spikes of brilliant pealike flowers of unusual colour.

-cordata splendens, tawny orange, yellow eye ringed carmine-rose. 1/6 and 2/6 -Lowii, dark green foliage; flowers darker, and larger than cordata; in bloom continuously for many months; one of the most beautiful trellis plants. 1/6 to 2/6.

CINERARIAS. See page 30.

CITRUS Japonica, Kumquat or Chinese Orange, a free bearing species, brightly coloured 2/6.fruits.

St. Michael's, the ordinary orange of commerce, large and prolific when quite small. 2/6.

Tangerine, delightfully perfumed little orange. Abundant bearer. 2/6.

Imperial Lemon, handsome fruit, delicious aroma. 2/6.

**Persian Lime,** pretty variety, good habit; richly-coloured fruits. 2/6.

CLETHRA arborea, beautiful white flower spikes

1/- and 1/6. COPROSMA Baureana variegata, glossy oval

leaves, margined creamy-white. 9d. and 1/-CORREA, The South African Fuchsia, brightly coloured pendulous flowers from Autumn till Spring.

cardinalis, bright scarlet, tipped green. 1/6 and 2/6.

-magnifica, clear sulphur-white. 1/- and 1/6.

**CORREA speciosa,** dark red tipped green. 1/- and 1/6.

**CORONILLA glauca,** a lovely succession of large bright yellow clover-like flowers. 9d., 1/-

to 1/6.

**CUPHEA platycentra,** scarlettube-shaped blooms, small black and white rim. 6d. and 9d.

CUPRESSUS funebris, a graceful decorative Cypress. Admirable for rooms, &c. (See illustration, page 58). 9d., 1/-, 1/6 and 2/6. Extra large, fine specimens, 3/6, 5/- and 7/6 each

**DAPHNE indica alba,** white form of the above. 2/- and 2/6.

**DIOSMA purpurea,** bright purple flower heads; when crushed, leaves have a strong odour. 1/- and 1/6.

**DIPLACUS**, evergreen Minulus, almost continually in bloom.

coccineus, rich red. 6d. and 9d.

glutinosus aurantiacus, light orange. 6d. and 9d.

puniceus, orange and red. 6d. and 9d.

DRACÆNA, foliage plants of easy cultivation with graceful leaves; excellent house plants; almost hardy.

**DRACÆNA australis,** beautifully recurving, rich green leaves. 9d., 1/- to 1/6.

Photo] ASPIDISTRA LURIDA VARIEGATA. [Clibrans. One of the finest of all plants for House Decoration. See page 55.

CYCLAMEN. See page 35.

CYTISUS, yellow, sweetly-scented flowers in Spring.

**atleeanus,** profuse bloomer. 1/- and 1/6. **elegans,** blooms and spikes large, very free. 1/6 to 2/6.

fragrans, the best known species, very sweet. 6d., 9d. and 1/-

**DAPHNE**, deliciously perfumed Spring-flowering evergreens; require abundant drainage.

indica rubra, lovely fragrant rosy-red flowers, 1/6 to 2/6.

**DRAGÆNA Bruantii**, handsome, an ideal house plant. 9d., 1/- and 1/6.

**Eeckautei,** splendid for decoration. 9d., 1/- to 1/6.

—indivisa, graceful, long tapering green leaves. 9d. and 1/-

**Parrei,** rich green, with dark red midrib. 1/6 to 2/6.

**EPACRIS.** Winter-flowering plants, branches covered with bright tubular flowers; various colours. (See illustration, page 59). 1/6 and 2/- each.

Many Greenhouse Plants can be supplied in larger sizes at higher prices.

ERYTHRINA, bright red pea-like flowers from May to July; prefer strong loam, liberal treatment, abundance of water and sun from early spring to September, and complete rest during Winter. Crista-galli, compacta, flowers richest coral-

red. 1/- and 1/6.

Hendersonii, dark crimson. 1/- and 1/6.

Photo] Clibrans CAMPANULA PYRAMIDALIS ALBA. A charming plant for Conservatory or Greenhouse. See page 55.

ERICAS, or Heaths, among the loveliest of decorative plants, white, pink, rose-pink, yellow, and various other shades. 1/6, 2/- and 2/6 each. Hard-wooded Summer flowering species in variety, from 2/6 to

intermedius, large blush-white flowers. 1/6 and 2/6.

nerifolius, pretty pink-colonred flowers. 1/6 and 2/6.

EUCALYPTUS, the Gum Tree family.

cltriodora, exquisitely perfumed foliage. 1/- to 1/6.

**globulus** (**Blue Gum**), glancous foliage; excellent disinfectant. 1/- to 1/6.

EULALIA, decorative Japanese grasses, nearly hardy

gracillima, an elegant green leaved plant. 1/- and 1/6

japonica, fol. var., leaves stripped white and green; exceedingly handsome, of great value for groups. 1/- and 1/6.

-zebrina, attractive leaves cross-barred yellow and green. 1/- and 1/6.

EUPATORIUM petiolare, a beautiful decorative plant, rich green foliage, and large branching heads of flowers of a charming blush shade, passing with age to white; sweetly

scented, and very lasting. 6d., 9d., to 1/6 Purpusl, white flowers, in large heads, sweet heliotrope fragrance. 6d. to 1/6 vernale, the largest flowered of the Eupa-

toriums, dark bronzy-green foliage; flowers tinged with pink when first opened, pure white when mature; in branching corymbs 8 in. to 10 in. in diameter; they open early in the year, and remain in beauty for weeks. (See illustration, page 61). 9d., 1/-, and 1/6.

EURYA latifolia fol. var., foliage irregularly margined cream, useful for decorating. 1/- to 1/6

EUTAXIA myrtifolia, bright golden pea-like flowers. 1/6

FARFUGIUM grande, large heart-shaped leaves, blotched yellow; porous soil and half shade. 9d. and 1/-

FICUS elastica, india-rubber plant; stands house treatment perfectly. 9d., 1/-, and 1/6
---fol. var., see Stove Plants, page 81.

FRANCOA ramosa (Bridal Wreath), flower spikes 2-ft. long, covered with problush-white flowers. 9d., 1/-, and 1/6

sonchifolia, a pretty species, quite distinct from the foregoing. 9d., 1/-, and 1/6 GENISTA elegans. See Cytisus elegans.

GERBERA JAMESONI (The Transvaal Daisy), brilliant orange-red flowers, 3 ins. across, from July until September; does well in a greenhouse. 2/- and 2/6 each

GREVILLEA, decorative Australian shrubs with

long narrow blooms.

robusta, a popular plant, large grace-ful leaves; resists gas perfectly. 6d. and

HABROTHAMNUS, clusters of elegant urn-shaped flowers.

aurantiacus, orange-coloured trusses, 9d., 1/- to 1/6

elegans, reddish-purple, 9d., 1/- to 1/6

Photo] Cupressus Funebris (See page 56). A light and elegant decorative plant.

HEDYCHIUM, the Indian Garland, large Cannalike leaves and handsome flower spikes; liberal treatment and large supplies of water when growing.

coronarium, scented white flowers, 2 in.

across. 1/6

Gardnerianum, fragrant lemon-coloured flowers. 1/6

HIBBERTIA perfoliata, pale yellow. 1/- and 1/6 HIBISCUS Hugeli, a pretty species, of bushy habit, producing pale blue flowers. 1/- &

HUMEA elegans, light feathery, graceful flower spikes. 6d., 9d., and 1/-

MANTOPHYLLUM miniatum, umbels of 10 to 20 deep orange flowers. 1/6, 2/6, to 7/6

KALANCHOE flammea, bright orangered flowers, remain fresh for some weeks. F.C.C., R.H.S. 9d., 1/- and 1/6.

felthamensis, F.C.C., R.H.S., intense scarlet. Bronzy-green foliage; flowers in branching corymbs, last a long time on the 9d., 1/plant or when cut. and 1/6

Kewensis, deep pink flowers, a very fine interesting and useful garden hybrid; A.M., R.H.S

Kirkii, a very fine new species, producing white flowers in fine heads. 1/6.

KALOSANTHES, succulents, thriving in fibrous loam, leaf-mould, and brick rubbish.

coccinea, large scarlet trusses. 6d., 9d., and 1/-

Mrs. H. Cannell, pure white. 9d. and 1/

KOCHIA Trichophylla, an elegant foliage plant, very effective in pots for greenhouse and conservatory, or planted outdoor as a summer bedder; foliage, light green, changing to crimson in autumn; it attains a height of about 2 ft., forming a dense symmetrical bush. The plant is an annual (see illustration, page

62). 3d., 6d., and 9d. each. 2/6, 4/6, and 6/- per doz. LAGERSTRŒMIA indica (Indian Lilac), bright pink, long curled petals in many-flowered clusters.

1/- and 1/6

alba, pure white form. 1/and 1/6

LASIANDRA macrantha floribunda, rich deep violet-purple, produced with freedom, a beautiful plant, when allowed to attain a large size; can be trained for covering walls. 1/-, 1/6 to 2/6.

LEONOTIS LEONURUS, orange-apricot, flowers 2 in. in length, produced in whorls round the stem, densely with hair; a useful coated winter-flowering plant, varying in height from 1 ft. to 4 ft. 1/and 1/6 each.

LIBONIA, bright, dwarf Winter-flowering plants of easy culture; should be frequently syringed in Summer.

Clibrans

-floribunda, bright red, tipped yellow. 9d. and 1/-

Penrhosiensis, rich crimson-red, elegant. 9d. and 1/-

LINDENBERGIA GRANDIFLORA, Salvia-like flowers of a bright yellow colour, an excellent decorative subject, flowering freely when quite small. 6d. and 9d.

LINUM tigrynum, numerous sbowy bright yellow flowers in Winter; in Summer, should be frequently syringed. 9d. and 1/-

LOBELIA Tenuior, a beautiful Lobelia, exceedingly well adapted for a pot or basket plant; produces a multitude of flowers, of a lovely cobalt blue, with a white eye. 4d. and 6d

LOTUS PELIORHYNCHUS (Pigeon's Beak), scarlet flowers, 1 in. long, with a recurving hooded standard, narrow glaucous foliage; a beautiful and interesting plant. 1/- and 1/6.

LUCULIA gratissima, see Stove Plants, page 81.
MAPLES (Japanese), beautiful diversified foliage, specially desirable for decorative purposes, ranging from yellow to rich dark crimson and purple, and in form from broadly palmate to delicately cut-leaved and feru-like appearance. The finest and most distinct sorts, 1/6, 2/6 to 3/6 each; six, in 6 distinct varieties, our selection, 9/-, 12/6 and 15/-; 12 sorts, 21/- and 30/-

Photo EPACRIS IN BLOOM (See page 57).

METROSIDEROS florida, Bottle Brush Flower, so called because the red bristle-like flowers are arranged round the end of each branch. 1/- to 1/6.

MONOCHÆTUM sericeum multiflorum, a continuous bloomer, silky rose-coloured flowers in great profusion. 9d., 1/- to 1/6.

MOSCHOSMA riparlum, blush white flowers in light elegant spikes, rich green foliage, popular as a Winter-flowering greenhouse plant. 6d. and 9d.

MYOSOTIS Imperatrice Elizabeth, splendid blue. 6d.

MYRTUS, Myrtles, popular evergreens, per-fumed flowers and foliage; should be syringed in Summer, and must never become dry at the roots.

-communis, white flowers. 9d. and 1/-

-angustifolius, dainty narrow-leaved form, 9d. and 1/-

-fl. pl., fine double white. 9d. and 1/-Ugni, (syn. Eugenia Ugni), reddish-black deliciously perfumed berries. 9d. and 1/-

NEPETA glechoma varlegata, pretty trailer, for baskets or similar purposes. 4d.

NERINE Fothergillii Major, rich vermilionscarlet. 1/6.

-Sarniensis, (Guernsey Lily), crimsonscarlet flowers. 1/- and 1/6.

> NERIUM, or Oleanders, rank amongst handsomest greenhouse s. Should be cut down plants. after flowering.

> Albert Bravy, semi-double, delicate pink. 1/- and 1/6.

Dr. Goldfin, single, clear magenta rose. 1/- and 1/6.

Lilian Henderson, 1/- to 2/6.

Madonna grandiflorum, large double creamy-white. 1/-

rubrum plenum, rose, large, double. 1/- and 1/6.

splendens, bright double red 1/- and 1/6.

NICOTIANA affinis, (In 3 in. pots ready white sweetin April, 4d. each; 3/- per doz.; in 5 in. scented Toper hacco plant. pots later in the season, 9d. ea.; 6/- per doz.

Sanderæ, (New Hybrids), Gold Medal and F.C.C., R.H.S., and Gold Medal, Paris. Most beautiful of all the Nicotianas. They produce flowers covering a wide range of colours, pure white, pink, light red, dark red, purple, crimson, violet and salmon with the utmost profusion; of strong vigorous branching habit, and clothed from base to summit with flowers; exceptionally hardy and of strong constitution, admirably adapted for the Greenhouse, Conservatory, or decorative use Price as preceding, generally.

NERTERA depressa (Bead Plant), forms a dense carpet of tiny glossy oval leaves with a profusion of bright orange-red berries the size of a small pea. 4d. and 6d.

OPHIOPOGON jaburan fol. var., leaves beautifully striped cream; invaluable for table and conservatory decoration. 1/Fortunei, margins variegated white; dis-

tinct. 1/-

**OLEA fragrans,** clusters of sweetly fragrant yellowish-white flowers. 1/6.

PHORMIUM tenax, New Zealand Flax, shining leathery leaves of great beauty; useful decorative plant; nearly hardy. 1/- & 1/6.

**PHORMIUM tenax variegata,** beautifully striped cream and gold bands, ornamental and vigorous (see illustration page 63). 3/6.

PILEA muscosa (Artillery Plant), a small ornamental plant of compact bushy habit; pretty and interesting. 1/- and 1/6 each.

**PIMELEA,** of easy culture, but require much water and syringing in Summer.

— decussata, pretty reddish-rose. 1/- to 1/6.

spectabilis, large heads, white tinged pink. 2/6.

**POSOQUERIA multiflora,** velvety leaves; pure white sweetly perfumed flowers, in clusters. 2/6.

Photo] RICHARDIA ÆTHIOPICA. [Clibrans (Calla or Arum Lily).

**POLYGALA Dalmaisiana**, rosy-purple butterfly-like flowers. 1/-

PRIMULA KEWENSIS, F.C.C., R.H.S., flower stems numerous, 10 in. to 18 in. high, flowers in whorls, at intervals of 2 in. or 3 in. along their entire length. Each whorl has eight to 12 bright yellow flowers, very fragrant; an excellent plant for Winter use, also for cutting. (See illustration page 64). Young plants, in 3 in. pots, in Autumn, 6/- per doz.; in 4½ in. and 5 in. pots, later in the season, 9d., 1/-, and 1/6 each.

PRIMULA VERTICILLATA (Abyssinian Primrosc), deep yellow, seented flowers, produced in whorls; bold handsome foliage, covered with a fine white powder. A fine Winterflowering subject. 6d., 9d. and 1/- each.

REHMANNIA ANGULATA, A.M., R.H.S., flowers 3 inches in diameter, similar shape to those of Incarvillea Delavayi, rose-purple colour, yellow throat spotted deep purple; free and continuous. 9d. and 1/-

RICHARDIA (Calla), the Lily of the Nile or Arum Lily, of easy culture, requiring rich compost, and being marsh plants need abundance of water in the growing season.

Africana Multiflora, profuse bloomer, pure white spathes, large. 1/- and 1/6

**æthiopica**, the Lily of the Nile, pure white, excellent for Christmas and Easter decorations. 1/- to 1/6

-The Godfrey, spathes are whiter, and produced earlier, and in greater numbers than in *Æthiopica*. 1/- to 1/6

---grandiflora, larger flowers than the type. 1/6

-nana, or Little Gem, dwarf form, with graceful foliage; invaluable for cutting. 9d. and 1/

—"Perte von Stuttgart," pure white, a profuse bloomer, even in a small state; compact habit, very fine. 1/- to 1/6 each Childsiana, dwarf; snowy-white spathes of

large size; vigorous, free. 1/6

Rehmanni, the pink arum, an interesting and distinct variety. 1/6 each.

Elliottana

Pentlandii S

See Callas, page 55.

**ROGIERA gratissima superba,** pretty pink tubular flowers, in dense terminal clusters, sweetly scented; a very choice plant. 2/6

SAXIFRAGA sarmentesa, Aaron's Beard or Mother of Thousands, highly popular for hanging baskets, etc., with pretty leaves, and pendulous runners, white flowers, spotted scarlet and yellow. 6d. and 9d.

**tricolour,** foliage beautifully blotched cream and red. 9d.

superba, leaf with pretty green centre, zoned white and margined red. 1/- and 1/6

SAINTPAULIA ionantha, lovely blue flowers.

1/-

SEDUM Seboldii variegata pretty variegated variety, for baskets, etc. 6d.

**SIBTHORPIA europea**, tiny round leaves, forming a dense flat carpet on a moist soil. 4d.

— **variegata**, leaves broadly margined cream, 9d.

SOLANUM capsicastrum, the well-known Solanum, bright scarlet berries in abundance during Autumn and Winter. 9d. to 1/6

SPARMANNIA africana, fl. pl., handsome double white flowers in Spring; should be severely pruned soon after flowering. 1/- and 1/6

**STATICE**, blue flowers, which retain their colour and form for many months.

**Butcherii,** a strong free grower. 1/6 to 2/6

EUPATORIUM VERNALE. (See page 57). [Clibrans Photo]

STATICE Holfordii, broad leaved and vigorous. 1/6 and 2/6 profusa, of more branching

and shrubby habit. 2/6
STREPTOCARPUS, choice hybrid
seedlings. See page 85.

STREPTOSOLEN Jamesonii, bright showy trusses of pretty flowers from May to August. 9d. to 1/-

SUCCULENTS. See page 86.
TREMANDRA verticillata, rich blue pendulous flowers with purple spots; continuous bloomer of simple culture. 2/6

VALLOTA purpurea, Scarborough Lily, umbels of rich scarlet flowers. 1/- to 1/6

VERBENA. See page 86.

YUCCA aloifolia, fol. var. 2/6and 3/6

filamentosa variegata. 2/6 and 3/6

Hardy Yuccas, see Herbaceous Plants List.

#### NOTE.

We have always on hand extra-sized plants of the majority of Greenhouse and Stove Plants, and will be pleased to furnish full particulars of sizes and prices on application.

### Greenhouse Climbers.

ASPARAGUS. (See Stove Climbers, page 84.) All Asparagus are also well adapted for Greenhouse Culture.

BERBERIDOPSIS corallina, fragrant climber. bright pendulous globular coral-red flowers in clusters. 1/- and 1/6

BIGNONIA (Tecoma), graceful climbers, showy trumpet flowers; like a firm root run in a

sunny position. **Chamberlaynii,** yellow, in racemes from the axils of the bright green foliage. 1/6 cherere, orange flowers of great beauty.

magnifica, purple-crimson, light primrose

throat. 1/6 Regalis, yellow and red; large flower of great beauty; a handsome climber. 1/6 Tweediana, shining yellow. 1/6

venusta, brilliant orange-crimson. BOUGAINVILLEA glabra Sanderiana, rich violetred, free, small plants being covered. 1/6 to 2/6

(For other varieties, see Stove Plants, page 84)

CAMPANULA isophylla and vars. (See page 55).

CLEMATIS, likes liberal treatment and plenty of liquid manure.

coccinea, bell-shaped flowers, within, bright crimson without. 1/- and

indivisa, loose trusses of creamy-white. 1/-, 1/6 to 2/6

lobata, similar to the type, but with lobed leaflets. 1/-, 1/6 to 2/6

CLIANTHUS magnificus, the Great Glory Pea, a climber of extraordinary beauty, freely-produced bright crimson-scarlet flowers, over 2 in, long, with boat-shaped keel and long-pointed beak. 1/6 to 2/6

puniceus fl. albus, pure white, blooms with the utmost freedom. 1/- and 1/6

COBÆA scandens, rapid grower, large dark-purple bell-shaped flowers, from late Spring until Autumn; fairly rich light soil and abundant water during growth. 9d. and 1/-

#### Greenhouse Climbers-continued.

Photo]

KOCHIA TRICHOPHYLLA (see page 58)

· [Clibrans

COBÆA scandens, fol. var., richly margined creamy-sulphur. 2/6

CONVOLVULUS mauritanicus, a beautiful twining bind weed, pale blue, white throat. 6d. and 9d.

ECCREMOCARPUS scabra (Calampelis), graceful rambling shoots, many-flowered sprays of bright orange-red, light soil; grand for walls, pillars, and trellis. 1/- to 1/6

aurea (new), a very pretty variety,

producing rich orange-yellow flowers. 1/6

rosea, similar to the type, but producing beautiful rose-coloured flowers. 1/- and 1/6

FICUS radicans variegata, leaves green and

creamy white. 1/-, 1/6 and 2/6
-repens, small roundish leaves clinging 

doz.

-variegata, variegated foliaged variety; makes a charming companion to preceding. 9d. and 1/- cach.

- HABROTHAMNUS aurantiacus, (See Greenhouse Plants, page 57).
- elegans. (See Greenhouse Plants, page 57).
- HIDALGOA Wercklei, "Climbing Dahlia," a free-blooming climber; flowers brilliant scarlet, graceful. 9d. and 1/-
- JASMINUM, with deliciously perfumed flowers, likes peat in the compost.
- -grandiflorum, sweet white flowers, reddish beneath; June to October. 1/and 1/6
- -graclllimum, Winter bloomer, white sweet-scented, in clusters, good for pots and baskets. 1/- and 1/6
- hirsutum (syn. pubescens), large white flowers in trusses. 1/- and 1/6
- KENNEDYA monophylla lilaclna, lilac flowers; excellent for training over trellis or pillars of a roof; likes firm potting and partial shade. 1/- and 1/6
- ovata, fine purple-blue flowers. 1/- and

#### Greenhouse Climbers-continued.

LAPAGERIA, particularly effective over a greenhouse roof; wreaths of lovely waxen bellshaped flowers, lasting well when cut; require abundant drainage, plenty of water during growth, and frequent syringings till the flowers open.

alba, pure white form. 2/6 to 3/6 rosea, flowers rosy-crimson. 1/6 to 2/6

superba, very large flowers of a fine rich crimson. 1/6, 2/6 to 3/6

Nash Court Variety, intense rich crimson. 2/6 to 3/6

LONICERA, Honeysuckle.

-semperflorens minor, scarlet tubular flowers; valuable for greenhouse rafters. 1/- to 1/6 MYRSIPHYLLUM asparagoides myrtifolia (A.M., R.H.S.), a beautiful sport from the wellknown Smilax, leaves of but one quarter the size and borne on long feathery trails often 6 ft. to 8 ft. in length; when cut the trails remain fresh for several days; for decorative use on tables, for baskets, show bouquets, or wherever a light, graceful cffect is required this is indispensable 1/6

PASSIFLORA, Passion Flower, easily-grown climbers; if planted out should be restricted in root room.

Arc-en-ciel, lovely violet blue. 9d., 1/- to

PHORMIUM TENAX VARIEGATA. (See page 60). Photo] [Clibrans

LOPHOSPERMUM scandens, lovely purple-violet trumpet flowers. 9d. and 1/-MANDEVILLEA suaveolens, large, pure white, sweet-scented funnel-shaped flowers. 1/6 and 2/6

MAURANDYA Barclayana, beautiful Mimulusshaped flowers, violet-purple, creamy-green tube. 1/- and 1/6

MITRARIA Coccinea, bright scarlet flowers on slender stems; grow in cool shady part of house on peaty soil with plenty of sand. 1/- and 1/6

MYRSIPHYLLUM asparagoides, so-called Smilax: glossy green leaves and dainty trails; favourite for bouquets, &c. 6d. and 9d.

PASSIFLORA cœrulea, the common blue Passion Flower; almost hardy. 9d., 1/- to 1/6

Constance Elliott, pure ivory-white, sweetscented. 9d., 1/- to 1/6

edulis, Robert's var., the Edible Fruited Passion Flower, white tinged purple; fragrant; produces enormous crops of fine luscious fruit in an ordinary vinery. Plants of best variety. 1/- and 1/6

Eynsford Gem, purple red, shaded rose. 9d., 1/- and 1/6

Neumannii, sepals and petals greenishwhite, blue centre, a very fine hybrid. 1/6 and 2/6

#### Greenhouse Climbers—continued.

PRIMULA KEWENSIS. (See page 60).

[Clibrans

PASSIFLORA Watsoniana, exquisitely perfumed flowers, sepals white, petals lilac. 1/and 1/6

For other Passifloras see Stove Climbers. PLUMBAGO capensis, pale blue. 6d., 9d., 1/and 1/6

- alba, beautiful white form. 6d., 9d., 1/- to 1/6

PUERARIA THUNBERGIANA, a rapid growing greenhouse climber, valued for its ornamental foliage; flowers bluish-purple, similar in form to those of a pea. 1/6 to 2/6 each.

RHODOCHITON volubile, well-shaped reddish calyx, and dark purple-red funnel-shaped corolla; free. 9d. and 1/-

RHYNCHOSPERMUM jasminoides, clustered, very fragrant, 1/- and 1/6

RUBUS Moluccanus, prettily foliaged climber, stems covered with rich velvety-brown tomentum, leaves greenish-grey with a silvery sheen, distinct from any other climbing plant. 1/- and 1/6

SMILAX. See Myrsiphyllum.

SOLANUM jasminoides, bluish-white in graceful sprays. 9d., 1/- to 1/6

#### Greenhouse Climbers-continued.

SOLANUM Wendlandii, lilac-blue flowers nearly 3 in, across. 1/6 to 2/6

For other Solanums see Stove Climbers. SOLLYA Drummondii, tiny but lovely clear turquoise blue flowers; peaty soil. 1/- and

SWAINSONIA, beautiful spikes of pea-like flowers; sandy loam and peat.

galegifolia, deep red. 9d., 1/- to 1/6
—alba, pure white, fine. 9d., 1/- to 1/6 TACSONIA, allied to the Passion Flower, of easy

growth.

exoniensis, bright rose, over 5 in. across. 1/- to 1/6

TACSONIA Smytheana, brilliant reddish-salmon or orange-scarlet. 1/6 to 2/6

Van Volxemi, scarlet, of singular beauty, often 5 in. across; one of the best. 1/-, 1/6 to 2/6

TECOMA (Bignonia) jasminoides, white, streaked red. 1/- to 1/6

— alba magnifica, large white. 1/6 to 2/6
THUNBERGIA alata alba, showy white flowers with a long tube. 9d. and 1/-

**aurantiaca,** lovely orange, large black disc in centre. 9d. and 1/-

For other Thunbergias, see Stove Climbers, page 85.

#### Collection of Greenhouse Climbers.

Our selection, six in 6 beautiful distinct sorts, 5/-, 7/6, 10/6 and 15/-Our selection, twelve in 12 beautiful distinct sorts, 9/-, 12/-, 18/- and 30/-,

## Heliotropium—Heliotrope.

A well-known useful subject for the Greenhouse or Conservatory. Deliciously fragrant for cutting. As a bedding plant is also useful.

> PURCHASERS' SELECTION, 4d. each, 3/- per doz., excepting those priced. OUR SELECTION, 2/6 per doz. Larger Plants, 6d. and 9d. each.

No

- 3 Albert Delaux, white, shading to deep lavender-blue; leaves marked with yellow.
- 11 Bouquet Perfume, lilac-blue; fragrant. 14 Buccleuch Bedder, lavender blue, fine.
- 33 Dr. Jeulin, large trusses of violet flowers. (A.M., R.H.S.)
- 43 Inverness Blue, dark blue, superb.
- 46 Jean d'Arc, white in large heads; charming.
- 50 Lord Roberts, large heads of lovely metallic violet fragrant flowers; a grand variety.
- 55 Madame Cellier, light blue, effective.

No.

- 57 Madame Daurel, immense truss, intense violet-blue
- 60 Madame de Bussy, blue, white centre.
- 63 Madame Emma Brouillet, dark reddish-
- 79 Mrs. Lewington, immense truss; dark
- 86 Picciola, violet-rose.
- 89 President Garfield, bright mauve-purple.
- 95 Swanley Giant, rosy-mauve, in large heads
- 97 White Lady, pure white; free.

Standard Plants.— We can supply a few of the above varieties, grown as standards, with 18 in. to 24 in. stems and nice heads. 2/6 and 3/6 each.

Seed, mixed, saved from finest named varieties. Per packet, 6d.

## Hydrangeas.

Are splendid plants in Conservatories. They like rich soil, consisting of loam and manure in equal parts, and a copious supply of water may be given in the growing season. Artificial manure applied just as the flowers are developing is beneficial.

PURCHASER'S SELECTION, 6d. each; 5/- per doz. OUR SELECTION, 4d. each; 3/- per doz. BLOOMING PLANTS, 9/-, 12/- and 18/- per doz.

- 9 Arborescens, grandiflora alba, large panicles of pure snow-white flowers during the summer; a new introduction from \merica; of great value either for cultivation in pots or in open ground. and 5/- each.
- 3 hortensis cyanoclada, blue; very attractive.
  - Souvenir de Clair, white flowers forming a marginal guard, central flowers like small blue stars.

No

- 7 hortensis cyanoclada variegata, leaves variegated white.
- 12 japonica, rosy-lilae changing to bright
- Jeanne d'Arc, pure white, large heads, stems black
- Mariesii, light pink, tinted mauve. 42 very large.
- nigra, rose, immense trusses. 18

#### Hydrangeas—continued.

No.

21 hortensis otaksa monstrosa, pale rose, floriferous, even in a young state.

26 -- Sapphire, azure-blue, vigorous and free.

30 - Thos. Hogg, white.

33 — tricolor, prettily variegated white and vellow.

37 **Lindleyana**, vigorous, floriferous variety; flowers rosy.

No.

17 ramulus coccinea, "Red Branched," redcoloured branches, deep rose-coloured flowers.

52 stellata fimbriata, pure white, fringed,

crimson spot in centre.

56 - — rubra plena, the rosy-red blossoms almost cover the plant, and remain in perfection longer than the single ones.

### Liliums.

Among bulbous plants the Lilium is unrivalled for the embellishment of a Conservatory. The bulbs should be potted in the Autumn, and grown on so as to bloom in succession. Loam and peat

Photo]

LILIUM HARRISII.

[Clibrans

in equal proportions, with a small quantity of sand will grow them well. After potting, plunge 6 in. deep in damp cocoa fibre, withholding water until top growth has commenced; place in a cold pit and protect from frost, removing to the Greenhouse as required. When coming into flower, liquid manure may be given with good result. Re-pot in fresh soil as soon as the stems die down.

Those named below are most suitable for Greenhouse and Conservatory decoration. The undernoted prices are for plants in pots in full growth.

Harrisii, abundant white flowers. 1/- and 1/6 each.

longiflorum giganteum, white trumpet-shaped flowers. 1/- and 1/6 each.

speciosum (lancifolium) album, white. 1/ and 1/6 each.

- album Krætzeri, immense white flower, with greenish band in centre of each petal. 1/- and 1/6 each.
- Melpomene, richly suffused with crimson, the finest and best coloured of all speciosum varieties. 1/- and 1/6 each.

During the Summer we can supply varieties of Lilium Speciosum in large pots containing six or seven bulbs in full growth at 5/-, 6/- to 7/6 per pot.

### Lantanas.

Bloom nearly eight months in the year; are seldom attacked by insects, and thrive in two parts loam, one part leaf-mould or decayed manure; pot firmly and water freely whilst growing. Most useful plants for Greenhouse or bedding.

Purchasers' selection, 4d. each; 3/- per doz. Our selection, 2/6 per doz.

No.

- 2 Amiel, brightly coloured, free and compact.
- 5 Bengali, clear rose; floriferous.
- 9 Calypso, rose-coloured fading to yellow.

No

- 11 **Chelsea Gem,** rich crimson and amber, the brightest coloured of all Lantanas.
- 13 Clio, gamboge, passing to reddish-purple.

#### Lantanas—continued.

No.

- 16 Comtesse de Biencourt, rose, orange-yellow centre.
- 22 Delicatissima, rose, suffused bright lilac, dwarf and free.
- 28 Drap d'Or, bright yellow, most floriferous.
- 34 Le Patriote, brilliant yellow, scarlet centre.
- 43 Rayon de Solell, deep yellow, changing to rosy-violet.

No.

- 47 Reve Poitlvine, rose, shaded silvery-white.
- 51 Salviæfolia, rosy-lilac, very free.
- 55 Ultima, bright yellow.
- 57 **Venusta,** rich deep golden-yellow, red centre.
- 59 Victoriæ, pure white, salmon-lemon eye.

Seed finest mixed, per packet 6d.

## Marguerites.

Invaluable for the Greenhouse, Conservatory, Window Boxes, Bedding, and similar purposes

Photo]

MARGUERITE QUEEN ALEXANDRA.

[Clibrans.

#### Choice New Double-Flowered Varieties.

- 2524 "Queen Alexandra." Flowers 2½ in. to 3 in. diam.; of the purest white, anemone centre single, semi-double, and double flowers are produced on the same plant; the double flowers are produced in excess of the single ones. When placed in water the flowers retain their freshness for a long period. (See illustration above). 6d. each. 4/- per doz.
- 2525 Pink Queen Alexandra, A.M., R.H.S., 1908, a very beautiful new variety of Queen Alexandra; in habit, freedom of bloom and growth it is identical with its parent, but differs in the centre of the flower, being a beautiful blush-pink; a very lovely variety. 3/- each. 30/- doz.

#### Marguerites-continued.

#### General Collection.

Purchasers' selection, 4d. each; 3/- doz. Our selection, 2/6 doz.

Plants in larger pots in bud or bloom 9/-, 12/- and 18/- doz.

No. 2499 Branching Etoile d'Or, yellow.

2504 coronarium grandiflorum, white.

2506 **Coronation,** pure white, anemone centre; free and vigorous. A.M., R.H.S.

2509 Etoile d'Or, yellow.

No. 2514 frutescens nivalis compactum, white, free. A.M., R.H.S.

2517 Golden Sun, rich yellow flowers of large size. A.M., R.H.S.

2520 Halleri-Maxima, white.

### Mimulus Moschatus-Musk.

The "Musk Plant," Minulus Moschatus is known to all, but there are other varieties worthy of attention, possessing the exquisite odour of the type, with larger flowers, and are of more compact growth.

Price 3d. each; 2/6 per doz.

grandiflorus, pure yellow. moschatus, the old-fashioned Musk. Harrisonii, grand variety, delightfully fragrant.

Varieties not catalogued can be supplied at usual prices.

#### Palms.

For Conservatory or room decoration no other class of plant can impart a richer or more graceful appearance. We make a great speciality of Palms, cultivating an immense stock, ranging in size from small seedlings, 2-3 inches in height, to large specimens 10 and 12 feet high.

Photo]

"PHŒNIX RŒBELINI."

[Clibrans

#### New Palm: "Kentia Sanderiana."

A very pretty and charming species, the pinnæ are long and narrow, the rachis is long, sleuder, and arching, giving the plant a most graceful, light, and airy appearance, it is entirely distinct from any other species of Kentia yet introduced, and makes a most effective plant for table work or decorative purposes generally; it is equally useful and beautiful either in a small or large state. As Stock of this Palm is very limited, we can only offer as long as unsold. Strong, healthy young plants. 1/6 each. Larger 2/6 each.

#### New Palm: "Phœnix Rœbelini."

For decorative use in general, and table work in particular, "Phœnix Rœbelini" will prove itself indispensable. The plant (as will be seen from illustration above) is of light and handsome appearance, the fronds are prettily arched and furnish the whole plant to the rim of the pot. The pinnæ are a deep glossy green, narrow and gracefully recurving.

## Pæonia Arborea (Tree Pæony).

Very beautiful when grown and flowered in pots in a cool house. 2/6 and 3/6 each. Six lovely varieties, 15/- and 21/-

## Pelargoniums (Large Flowered).

Show, Spotted French and Early Flowering.

Turfy loam, leaf mould, and some charcoal or sand, is the best compost: the pots should be well-drained, and the soil made firm. When the plants are flowering, shade from the sunshine, and place where plenty of air is admitted.

#### Choice New Varieties, 1/6

No.

- 23 Beauty, upper petals intense maroon, with narrow margin of paler colour; lower petals salmon-rose, feathered and marked maroon; large bold trusses, very fine.
- 37 Bridesmaid, delicate pink, suffused with a deeper shade; crimson-maroon blotches on upper petals; very handsome.

CLIBRANS' PRIMULA SINENSIS.

## Primula Sieboldi (Cortusoides.)

Japanese Primulas.

A pretty class of Primulas producing large heads of charmingly fringed flowers, ranging from white, crimson, mauve, to lavender-blue; splendid for shaded border or rock garden. They like a light soil with a mixture of leaf soil and decayed manure. As pot plants for a cool house they are very suitable. The flowers under glass have a delicacy of tint and beauty seldom seen out of doors

Twelve fine varieties, our selection, 3/-; 25 plants in 12 sorts, 6/-

For descriptive list of varieties, see Herbaceous Catalogue.

## Primula Sinensis Fimbriata.

"The Chinese Primrose"-Clibrans' Strain.

We have given much attention to improving the Primula and the result is a very fine strain equalling any we have seen in size of flower, freedom, habit and colour. The flowers are of immense size, round, of the finest substance, beautifully fringed, and most distinct and varied in colour. A rich mixture of loam, leaf-mould, manure, and sand is the best compost for them. Careful attention should be given to ventilation, watering, and shading. They require plenty of water in the Summer, but in Autumn and Winter it must be used most sparingly.

Young plants of this splendid strain, from the beginning of June to the end of August, from stores, 1/6 per doz.; 50 for 5/-; 100 for 10/-

Young plants of this splendid strain from July to the end of September, in small pots, 2/6 and 3/- per doz.; 18/- and 21/- per 100.

Larger plants, in 5 in. pots, during Winter and Spring, 6/- per doz. Seed, 1/- and 2 6 per packet.

## **Double Chinese Primulas.**

These are charming plants for Conservatory or Greenhouse decoration during Winter and Spring months. For cutting purposes they are invaluable, the flowers never dropping, as in the single varieties. The following arc distinct and effective.

Alba plena, pure white. 9d. and 1/- each.

**Annie Hillier,** beautiful light pink, attractive. 1/6 each.

candidissima, white, superior to alba fl. pl. 1/6 each.

Earl of Beaconsfield, bright rosy-carmine. 1/6

Marchioness of Exeter, white, slightly speckled pink. 1/6 each.

Stewartii, fine double-red variety, quite distinct. 1/6 each.

Seed, saved from choicest-named double varieties, 2/6 per packet.

## Primula Obconica.

As a cool Greenhouse Plant for flowering in Winter and early Spring, Primula Obconica and its varieties are of the ntmost value; grown in a cool temperature they never fail to produce an abundance of flower at a season when flowers are particularly acceptable.

**Obconica,** the flowers vary between white and pale lilac, produced with the utmost profusion. 3d. each, 2/6 per doz.; larger, 4/- and 6/- per doz.

Grandiflora alba, white, very beautiful, 6d. each, 4/6 per doz.

——Brilliant, red, beautiful variety. 6d. each, 4/6 per doz.

fimbriata alba, white, very pretty, fimbriated flowers. 6d. each, 4/6 per doz.

Obconica Grandiflora gigantea, similar in colour to the type, but producing flowers of enormous size; a splendid variety. 6d. each, 4/6 per doz.

— Rosea, pretty rose-coloured variety.
 4d. each, 3/6 per doz.

Vesuvius, bright carmine-red flowers, in great abundance. 6d. each, 4/6 per doz.
 Rose Queen, bright rose, 6d. each. 4/6 per doz.

During Autumn and Winter larger plants in 5 in. pots can be supplied at 6/- per doz. Young Plants from Stores, Obconica, 1/6 per doz.; other varieties, 2/- per doz.

## Rhododendrons (Greenhouse Varieties).

Should be potted very firmly in fibrous peat and silver sand with ample drainage. After potting keep in a moist atmosphere in a gentle heat. Water carefully until the roots have commenced to run in the new compost, after which the supplies must be gradually increased. When the growth is completed give plenty of air to enable the wood to ripen and develop flower buds. They should not be over-potted; every third year is usually sufficiently frequent, the most favourable time being April and May.

Our selection, 18/- and 24/- dozen; according to size.

Those marked (\*) are sweet scented.

No.

- \*2 **albescens,** glittering white, marked at the base sulphur-yellow. 1/6 and 2/6 each.
- 4 Amabile, delicate carmine, tinted rose. 1/6 and 2/6 each.
- 74 arboreum, scarlet, magnificent species. 2/6 each.
- 75 roseum, beautiful rose-colour. 2/6
- 77 Baroness Henry Schroeder, delicate blush white; robust. 1/6 and 2/6 each.
- 10 Brilliant, brilliant scarlet. 1/6 and 2/6.
- 16 Cloth of Gold, clear yellow. 3/6 and 5/-each.

No.

- \*12 **Countess of Derby,** pure white, sweetly-scented, a lovely variety. 2/6.
- \*13 Countess of Haddington, blush-white, beautiful. 1/6 and 2/6.
- \*14 Countess of Sefton, white, rosy-purple band. 1/6 and 2/6 each.
- 18 **Duchess of Connaught,** bright vermilion-red. 1/6 to 2/6.
- \*29 fragrantissimum, French white. 1/6 to 2/6 each.
- \*32 Gibsonii, white, very pretty. 1/6 to 2/6
- \*41 Lady Alice Fitzwilliam, fine white, large flowers. 1/6 to 2/6 each.

Photo]

#### Rhododendrons-Greenhouse Varieties-continued.

No

- 43 La Belle, pure white, dwarf and free. 1/6 to 2/6 each.
- 44 Lord Wolseley, buff-yellow, tinted rose, 1/6 to 2/6 each.
- 50 Minerva, soft nankeen-yellow, filaments rose. 1st C.C., R.H.S. 2/6 each.
- 54 Princess Alexandra, pure white. 1/6 to 2/6
- \*55 Alice, bell-shaped flowers, flushed pink. 1/6 to 2/6 each.
- \*61 Queen of Dwarfs, snow white, free bloomer. Several 1st C.C.'s. 1/6 to 2/6 each.

No.

- 102 Ruby, intense crimson-scarlet. F.C.C., R.H.S. 3/6 and 5/- each.
- \*63 **Sesterianum**, large white, elegantly fringed. 1/6 to 2/6 each.
- 65 Souvenir de J. H. Mangles, bright orangeyellow, suffused rose-pink. 1/6 to 2/6 each.
- 68 **Triumphans,** crimson-scarlet. 1st C.C. 1/6 to 2/6 each.
- 69 **Veitchianum,** large white flowers, yellow at base, elegantly fringed. 1/6 to 2/6 each.

## Rhododendrons (Hardy Sorts) for Forcing.

The finest named varieties, scarlet, crimson, pink, white, etc., for forcing. Set with bloom buds, 30/- and 42/- per doz.

#### ROSES IN POTS (See Page 87).

## Salvias.

They produce their showy flowers in profusion when other blooms are scarce; the colours include intense blue, purple, scarlet, rose, striped and several intermediate shades. Rich soil is needed, loam and manure in equal parts.

Purchasers' selection, 4d. each, 3/- per doz. Our selection, 2/6 per doz. Blooming Plants, of "Splendens" type, in Autumn and Winter, 9/- and 12/- per doz.

Max

- 1 Azurea, sky-blue, variety of great beauty.
- 2 Bethelii, rosy-pink, tipped white.
- 7 **Cyanea**, an interesting new species from Costa Rica, producing panicles of beautiful sky-blue flowers. 6d. each.
- 11 Fireball, bright scarlet, very early.
- 16 Fulgers, bright scarlet, good for outdoor planting.
- 24 Heerii, superb for winter-flowering, dazzling scarlet.
- 26 Leucantha, a white flowered species; long narrow lanceolate leaves.

No

- 28 Patens, rich blue; fine for borders.
- 31 rutilans, beautiful magenta; apple-scented foliage.
- 35 splendens alba, white form of Splendens.
- 38 atropurpurea, rich crimson.
- 41 **grandiflora**, larger flowers of more brilliant scarlet-vermilion than the type: numerous spikes, longer than in other varieties of *splendens*.
- 44 **Zurich**, brightest scarlet, free and continuous.

## Photographs of Plants and Flowers.

We are always open to consider offers of Photographs of Plants and Flowers suitable for reproduction in our various Catalogues.

The Photographs, to be of use, **must be clear and distinct**; they may either represent the whole or part of a plant, providing the picture gives a true representation of the subject.

Views of Gardens, Borders, Avenues, etc., will be welcomed, but in all cases must present some distinctive characteristic, and not be simply an ordinary view.

Photographs should be sent to our Headquarters, addressed—"Clibrans, Altrincham," carefully packed. They will be carefully examined, and we will immediately communicate with the sender, stating what Photos we are prepared to purchase.

0

## Stove Plants.

In the growing season the heat should be kept to 65° and upwards, and the syringe used freely at least twice daily. Evaporating troughs should be filled, and air given according to the state of the wind and outdoor temperature. A rise of temperature from sun heat (not fire heat) up to 90° will be more beneficial than otherwise, providing the atmosphere is moist; dry heat must be avoided Most of the plants in this section require peat soil, or a mixture of peat and loam, with a little old manure, sand, and leaf-mould. Liquid manure, or top-dressing with artificial manure, is beneficial to all when well established, if free growth and profusion of bloom are desired.

## New Plant Acalypha Clibrani.

A very beautiful Acalypha, distinct from all others. The leaves, 5 to 6 inches in length, of somewhat oval form, fairly broad, with a prettily indented margin, are of a beautiful creamy-white, relieved with splashes and markings of bright green. The plant is bushy, somewhat pyramidal in habit, a good grower and retains its remarkable colouration throughout the whole year. As an exhibition and decorative subject, it is certain to take a high position, being quite distinct from any other existing plant. Visitors who have seen this plant growing in our Glass Houses are unanimous in their praise.

Strong Plants, 3/6 and 5/- each.

#### General Collection.

Our Selections of Stove Plants, excluding varieties which Purchasers already possess:—

Twelve in 12 varieties ... ... 9/-, 12/- and 18/- Fifty in 50 varieties ... ... ... ... 21/-, 31/6, 50/-, and 75/- One hundred in 100 varieties ... ... 52/6, 84/- and 126/-

Half of any collection at half price. The highest prices are for plants of larger sizes, and choicer sorts. Any collection may be at purchasers option, wholly or partly flowering, or ornamental foliage.

Those marked (o) have ornamental foliage.

NOTE.—We have always on hand extra-sized plants of the majority of Greenhouse and Stove Plants, and will be pleased to furnish full particulars of sizes and prices on application.

## Stove Climbers.

Some of the most beautiful Plants grown in Stoves are amongst the Climbers. In our collection are all the best sorts known.

We have beautiful specimens for immediate effect of most Climbers, such as Stephanotis, &c., which have flowered for the last few years and are in fine condition for covering roofs, &c., or growing as exhibition plants. We invite inspection, or shall be pleased to send full particulars on application.

## Tropæolums.

Handsome Trailers for Conservatories, &c., their brilliant blooms standing out in charming relief against the green foliage. The dwarf varieties are indispensable for bedding.

#### New Variety "Darmstadt."

A very fine new double flowered variety, producing an abundance of rich, deep, orange, perfectly double flowers  $2\frac{1}{2}$  inches across; a magnificent climbing variety. Beyond all doubt the finest introduction to Tropwolums that has been made for many years, we give it our highest recommendation. 1/6 each. 15/- per doz.

Marked (c) are Climbers, (d) Dwarf varieties.

Purchasers' selection, 4d. each, 3/- per doz. Tweive, in 6 varieties, our selection, 2/6.

- No.
  c 2 Annie Clibran, rich golden-yellow, crimson blotch; fragrant.
- c 14 **Dr. Mules,** crimson, splendid for training over rockeries, &c., rapid grower.
- c 18 Gloire de Bordeaux, very double, bright scarlet yellow, washed gold.
- d 28 Mrs. Clibran, pure golden yellow, produces a brilliant display, dwarf habit.
- d 35 Nanum Variegatum, light scarlet, foliage,
- variegated creamy-white.
- c 41 **Phœbe,** pleasantly-scented, golden-yellow, crimson feather on each petal.
- d 49 **Scarlet Bedder,** scarlet flowers, very dwarf.
- c 62 Warrior, rich dark crimson-maroon; very striking, vigorous and free.

### Verbenas.

For Greenhouse or Bedding, Verbenas make a pretty display; when cultivated under glass, care should be taken to fumigate at intervals to ward off attacks of insects. A cool temperature at all seasons, together with a free circulation of air, and a free supply of water, during the Summer, suits them admirably.

Elien Willmott, the finest variety for pots, lovely pink with a white eye; a good grower and a free bloomer; the finest of its colour. 4d., 6d. and 9d. each; 3/-, 4/6 and 6/- per doz.

In variety, 3d. each; 2/6 per doz.

A full list of varieties appears in our List of Bedding Plants.

## Vines.

We can strongly recommend our Forcing and Planting Canes to the notice of buyers. They are grown without bottom heat, have an abundance of good fibrous roots, and are exceedingly strong, short-jointed, and thoroughly well ripened.

Strong Planting Canes, 3/6 and 5/- each. Strong fruiting Canes, 7/6, 10/6 and 12/6 each. For List of varieties and full descriptions, see our Fruit Catalogue.

## Various Plants.

**Gucumber Plants,** in several leading varieties. 6d. each; 5/- per dox. **Melon Plants,** 6d. each.

Tomato Plants, leading kinds, 4d. each; 3/per doz.

Vegetable Marrow Plants. 4d. each; 3/- doz.

## ROSES IN POTS.

For Growing Indoors.

Roses in Pots are a special department, four large houses being almost solely devoted to their cultivation. Our plants are renowned for their strong, sturdy, healthy, well-matured growth, and never fail to grow satisfactorily and flower profusely.

The finest varieties for cultivation under glass are grown in large quantities.

## Teas and Hybrid Teas, Noisette and Climbing Roses.

#### Prices.

Strong Plants, Bush and Climbing varieties, in 5 in. pots, 1/- and 1/6 each; 10/6 and 15/per doz., excepting those priced. Our selection, 10/- per doz.

Climbing varieties, extra strong plants, with long growths 8 ft. to 12 ft. in length, splendid plants in 7 in. pots, 2/6 and 3/6 each. 25/- and 35/- per doz.

Strong bush plants, trained to four stakes, in 7 in. pots, 2/6 and 3/6 each. 25/- and 35/- per doz. Extra-size specimens of the best varieties of Climbing and Bush varieties, can be supplied at 5/-, 7/6, 10/6, 15/- and 21/- each.

For varieties and full descriptions, see our Special List of Roses,

Free on Request.

## ROSES IN POTS.

For planting out of doors in Summer, filling-up beds, &c.

## Teas and Hybrid Teas.

To meet the demand for Roses to fill up blanks in, or to make new beds we grow in pots large quantities of Tea and Hybrid Tea Roses in the open, and can supply at 12/- and 18/- per doz.; 90/- and 125/- per 100

Roses in Pots-continued.

## **Dwarf Hybrid Perpetual.**

The best varieties in the most distinct and effective colours principally in  $6\frac{1}{4}$  in. pots, strong established plants, 1/6 and 2/- each; 12/- and 18/- per doz.; 90/- and 125/- per 100.

## Moss Roses.

Of these charming garden Roses we have an excellent collection, and offer the best sorts in strong plants, in 6\frac{1}{2} in. pots, at 10/- to 12/- per doz.

## Various other Roses.

HYBRIDS of CHINESE and BOURBON.
ROSA RUGOSA.
SWEET and PENZANCE BRIARS.
AUSTRIAN BRIARS.

SCOTCH ROSES.

PROVENCE and STRIPED PROVENCE.

WICHURAIANA ROSES, and many other species and varieties.

All strong established plants, in 61 in. pots, at 12/- to 18/- per doz.

Full descriptive list of varleties, Free on request.

#### **OUR SPRING LISTS.**

In addition to our List of Stove and Greenhouse Plants, Ferns, Palms, and all classes of plants for cultivation under glass, we publish the following Catalogues each Spring:

#### Dahlias.

A comprehensive and valuable list of all the best new and old varieties in every section.

#### Bedding Plants.

An invaluable list for all who have to deal with "bedding." Useful pocket size.

#### Garden Requisites.

Requisites and Garden Sundries of every description are included in this List.

WE SEND ALL OUR LISTS GRATIS AND POST FREE.

#### THE FORMATION OF PARKS, PLEASURE GROUNDS, &c.

This branch of our business is in charge of a Specialist, who has had many years' experience in all classes of Landscape work. The planting of Avenues, the laying out of Flower Gardens and Grounds, with or without rockery and water effects, carried out in the most natural style. The formation of Wild Gardens (now so popular) a special feature. Correspondence invited.

#### Indispensable to all Plant Growers.

## The 'ANTIPEST' Knapsack Sprayer

For Spraying all kinds of Plants and Crops (Indoor or Outdoor), Fruit, Trees and Bushes, with Insecticide or Fungicide; for the destruction or prevention of pests and disease; also for washing with clean water.

For the distribution of liquid disinfectant in Kennels, Pigeon Lofts, etc., and for all purposes where an evenly distributed liquid spray is required.

THE "ANTIPEST" IN USE.

#### SPECIFICATION.

Capacity about 3 gallons. Weight about 13 lbs. Copper and brass body. Oil resisting valves. Coarse, medium, or fine spray, or straight jet. Single or double nozzle. By means of an agitator, the liquid is kept well mixed, thus enabling thin or thick liquids to be used equally well.

All the parts are made to standard patterns, and can be easily and quickly replaced in event of loss, breakage or wear.

These Sprayers have been in constant use in our Nurseries for some years, and have given the best possible results. Our patrons find them equally useful and effective. The appliances are strongly made, there are very few parts to get out of order, and the internal arrangements are simple and easily accessible. An immense amount of spraying can be done effectively and with ease by the aid of an "Antipest." It can be used equally well by a youth or a man. They are adapted to spray any kind of liquid, and may be used for any and every kind of plant or crop, either under glass or out of doors. For the distribution of liquid disinfectant, or for use with clean water for washing windows, Carriages, Motors, Bicycles, &c., these Sprayers will be found of the greatest service. The various nozzle caps that are

supplied allow of a fine, medium, or coarse spray, as desired, whilst by affixing the jet nozzle, a single uninterrupted stream is obtained. For spraying such crops as Potatoes, the double nozzle will be found a great labour saver.

#### Price,

complete with Nozzle Caps for coarse, medium, and fine Spray, and single or double nozzle (as desired),

36/6 (nett).

THE "ANTIPEST

Carriage Paid for CASH WITH ORDER ONLY; otherwise, Carriage Forward.

NOTE. If Single and Double Nozzle are both required, an extra charge of 3.6 will be made.

NOTE.—A complete List of Manures appears In our Garden Requisites List, Gratis and Post Free.

Compost, for chrysanthemums, bulbs, soft wooded plants, such as fuchsias, geraniums, &c. Per bushel, 2/-

Turfs (sops). See above.

#### TO EMPLOYERS REQUIRING HEAD OR UNDER GARDENERS, HEAD OR ASSISTANT FORESTERS, OR FARM BAILIFFS.

We shall be pleased to send our List of Names and Addresses of suitable men, with full particulars of wages required, experience, and references. Great care is taken that no man shall be placed on our Register whose character is not good. Our acquintance with the men's abilities and characters cannot but be of service to all needing men, as the difficulty of selecting from scores of answers to an advertisement, or from applicants of whom nothing whatever is known, is felt by every employer of labour; frequently it is noticed that preference is given to an inferior man, and much better men passed over.

## Insect Destroyers, Appliances, etc.

Ant Destroyer, per bottle, 2/6 and 3/6

**Aphlcide**, for the distribution of Insecticides, 1/6 each

Aphls Brushes, per pair, 2/-
